

# Affordable infotainment system

Honestly for the price its a [great unit](#) that will do it all, but you do get what you pay for so the price point is the reason for my 5 star rating.

This is a sleek and easy to install unit. As long as you have the basic tools for electronics you will be able to install easy. Great GPS as well helped me on a 3 hour trip today.

But what is most important about any product is the service you get after. Pumpkin was very quick to resolve a few slight problems I had. Their employee Chloe, that i worked with, was very polite, prompt and took care of my problems. I was very very surprised with how well the interaction went. So what I am saying is, If your on the fence about this unit, buy with confidence, because if you were to have a problem you will have great support to assist you. Would recommend the product and the company. A++ in my book. Well done.

# Camry navigation stereo review

## Android 10

Put this [Pumpkin Android 10 double din car stereo](#) in a Camry. Wasn't sure on some of the instillation. Sent email to the support that they have and they replied quickly. They even followed up to make sure everything was working properly. (I was the one who didn't thoroughly read the instructions which caused me to be unsure, my answer was right in front of my face in black and white). The unit is user friendly and has awesome features. Can't wait to see what the next thing these guys come up with. Will recommend to anyone. The screen is clear and responds well!

## PUMPKIN CAR STEREO

This is a review of a cheap [Pumpkin head unit](#) with some nicer features like GPS and a decent amount of memory. The unit seems responsive and fast. The screen is not the brightest out of the box and has no obvious knobs to adjust it but if you go into settings (admittedly quite buried in the menus) then you can get brightness and contrast to be OK for daily driving. The sound output is great for my system (I only have two

channels) but not sure it would be great for surround. Everything about this unit is cheap but not cheap. Actually, you do not need a manual – all the pinouts are available in the settings once you power on the unit. The wires are all labeled well (like speaker wires have labels) and the wires on my unit follow standard codes so, for example, my sound was good the first time I hooked everything up. Best of all, when I made a mistake and failed to properly hook up the reverse wire, their tech support spent two days with me by email helping me troubleshoot. It was slow but I have to admire the commitment to the customer.

I just installed the unit so I have no idea if the screen will last or anything to do with longevity. I also think that if you have a few hundred dollars extra and don't want the installation hassle then maybe buy a brand name and have the dealer install it. If money matters though, then this unit is an impressive bargain for the money.
