

Customer Review for Pumpkin JY-C0662 Toyota 6.2 Inch HD Touchscreen 2 DIN Android Car Stereo

Here's my experience so far as I have only had [this unit \(JY-C0662\)](#) installed for a few days:

By **CoyoteAssassin**

Good

- **Very fast shipping**, I think it arrived in 4 days from China.
- **The build is very good and solid.** Buttons give good feel and the unit overall looks professional. Just remember this is not a top of the line Pioneer, Alpine etc, so don't get too picky... Let's just say I was pleasantly surprised.
- **Easy install...** It doesn't get much easier than this. The unit comes with the Toyota harness adapter and will plug directly into yours...Period. No bezel is required as mine fit the dash perfectly as if it was made by Toyota for the FJ cruiser. Only thing you'll need to do is to

either grind or flatten several centering dimples on the brackets as they don't have a place to sit on the HU. Took me 2 min with a ball-peen hammer a few love taps on the vice and voila. The factory HU uses 4 bolts per side but mine could "only" accommodate 3 per side... I hope it doesn't fall out! hahah

- **Back-lighting**...The description of the unit gives the impression that there are only a handful of colors to choose from, but I found that the color is infinitely adjustable and I was able to match the factory dash back-lighting with no problem.
- It's **Android**...So with an internet connection, you can connect to the **Google Play Store** and **download apps** to your heart's content. I would recommend replacing the stock launcher with something else... I am using Nova and it works much nicer and smoother. **The installed radio app, GPS (iGo), video player etc... all work good.**
- **Steering wheel controls** worked perfect... You just program them in the software settings.

Not so good/ But not so bad

- I lost the subwoofer functionality, but I think it's just a matter of connecting power to the correct wire...Pending..... Fixed!
- Memory Card. Recently installed a 32 GB micro SD card to hold my music, photos, videos, etc... 32 GB is the largest this system will accept, at least that is what they say.

Enjoy:

Radio

GPS Navigation

UI

RDS

Torque
