

Customer Review for Pumpkin KD-C0713 Mazda 3 Android 4.4 Double Din 7" HD Touchscreen Car Stereo

By **Steve**

I installed [this stereo](#) in my 09 Mazda 3. I say “stereo” but it really is so much more. It’s more like an entertainment center for my car, because it has changed the whole feel of travel. Simply put, I love this!

▪ GPS

Great GPS included with accurate maps and still can use video outputs, so DVDs play to rear monitors for kiddos in the back seat.

▪ APP

All the apps I’ve tried work flawlessly and switching between them is very fast.

▪ Quality

Not much else I can say other than if you are debating on this unit, take my word for it, you will be very pleased with the build quality and ease of install.

▪ Audio

I should also mention the audio playback is well above stock [car stereo](#) sound and everything is crisp and clear.

▪ Customer Service

On a side note, I contacted the seller to ask a question about SD card playback and was pleased to get response almost immediately. It seems that customer service is top notch as well.

Customer Review for Pumpkin LM-W0675 Toyota Corolla 8" Touch Screen Double Din Bluetooth Car Stereo

By **Thomas Penafiel**

Pros:

- Very sleek quality looking head unit. [This unit](#) fits perfectly into my 2010 Corolla and now it looks more modern. I can't describe how happy I am.
- Radio functionality is great. Plenty of preset slots for all of your favorite radio stations, and it will tell you the name of the song and who's singing it. Besides, the radio automatically shuts off when the phone rings.
- I purchased a backup camera to use with this and the screen shows a nice clear video feed. It was also very easy to install, and auto switched when I shift the car into reverse (you need to connect the reverse wire for this to work).
- Bluetooth audio quality is good and CD player is perfect!
- You can change the boot logo from "DVD" to your car's manufacturer.

Cons:

- GPS load time is about 15-20 seconds, which seems like a long time when comparing to a factory GPS.
- Sometimes callers have trouble hearing me over Bluetooth when they call.

Overall, I'm quite happy with my purchase. Both of the cons listed are very minor and do not change my overall opinion of this head unit. I'd recommend it to anyone looking for an economical upgrade to their Toyota Corolla. Nice work, [Pumpkin](#)!
