

Rotating touchscreen head units

Rotating screen is used heavily on laptops, DVD players, phones, etc. But it is also used on head unit now. The main advantage of the rotating screen is its adjustable viewing angle design. It makes the screen can be freely rotated to effectively to avoid screen glare and makes this cost-effective car stereo more splendid by offering clearer, consistent images from all viewing angles in stable response time and without bringing lighten or tailing when being touched. Pumpkin has released two kinds of rotating screen

head units, one is 1 din head unit, another is 2 din.

DAB+ (Extra device required)

OBD2 (Extra device required)

Cam-In/Rear camera (Extra device required)

What is MirrorLink?

For those of whom want to utilize the best of your phone features with the car stereo, you need to notice the MirrorLink function that car stereos offer. MirrorLink makes it easy to bring the application of your phones to the car dashboard. MirrorLink is a way of 'mirroring' whatever is on your smartphone onto your car stereo display. No matter movies or maps, that all can be achieved with screen mirroring.

Our car stereos use a MirrorLink application called 'EasyConnection'. It is a driving assistant. This App integrates navigation, music, telephone, and other driving functions, you can also add your favorite applications to this App. With the interconnection of EasyConnection App on the navigator, the screen of the mobile phone can be projected onto the navigator screen and can be operated on the navigator screen. Any application can be made to work with MirrorLink, but not all applications should be used while driving. For example, you shouldn't play games or watch a movie while driving.

How does your screen mirror your phone to your car stereo? It is quite easy. Just open the EasyConnection application both on your car stereo and your phone. Then, choose the connect way you want on the car stereo. After connected, the apps will run on your smartphone while will be displayed on the car stereo monitor.

AA0341B Android 9.0 Single DIN Flip out Car Stereo

I am really pleased with the radio, it can do so much and so well and so quickly, great product, I really have to praise it. Another thing about the radio, the installation on my car Seat Arosa H6 1998 was very easy, and so far everything works perfectly.

Here are some of the features of this car radio.

1. Flip-out screen: that looks pretty cool, you can also retract the monitor and continue playing the music.
2. USB/SD: it supports both the micro SD card and USB.
3. Menu: there are buttons on the panel, with the buttons, you can go to the main menu and control the volume.
4. Multi-color button: when turning on my car key, the buttons light up and they can be changed color.
5. Audio setting: you can use the slider to change the position of the box and other settings such as volume, EQ-3, bass, balance, VIP.
6. Radio: unfortunately we are now in the garage so it can not find anything here.
7. Video function: you can watch music videos, movies, and YouTube videos.
8. Bluetooth: after you paired your mobile phone to the radio, you can make a phone call and listen to music.
9. Navigation: I will show it works in the later video.
10. In the menu, you can see and set the WiFi/ Internet, auto settings, apps & notifications, storage, RAM, users and

accounts, Google account and system, etc.

11. You can end all the apps once like mobile phones close everything.

12. We all know that watching movies while driving is forbidden, but it can fade in up and then the movie will run up there but the whole menu will have it. It's pretty awesome.
