

Customer review on Pumpkin 7" Android 10 Single Din Bluetooth Flip Out Car Stereo

Android 10 CAR RADIO PLAYER

Fits great into my 2001 Porsche Boxster. It's fast, responsive, and sounds great. It has way more features than I expected. I paired the unit with some generic steering wheel controls without needing any additional adapters. The only issue with the unit is that you are limited in how you can tether your phone to share mobile data. This unit relies exclusively on WIFI / mobile hot spots, which is fine as long as you are charging your phone while driving, otherwise, mobile hot spots usually drain phone batteries quickly. I

would love to see USB tether and/or Bluetooth tethering, but PUMPKIN does not currently support those features.

The touch screen is instantaneous, and I love that you can download apps to it. The wifi and GPS have worked flawlessly so far. I've used both my home wifi in the driveway and my phone as a mobile hotspot. I've made several Bluetooth calls and asked the person on the other end how it sounded, and they couldn't tell I was on Bluetooth. I ordered the pumpkin backup cam which also works awesome.

Make sure the backup camera you bought worth

Backup camera is a special type of video camera that is produced specifically for the purpose of making reverse easier and lessening the risk of accidents while parking. It can offer a driver a way to see their blind spot, no matter how dark it is or what the weather is like.

Normally, backup camera has these 4 features to increase driving safety.

1.Night vision

It uses infrared lights to help illuminate the area behind you, in addition to the light from your tail lights.

2.View angle

Backup camera offers great visibility, has at least a 110-degree scope, with some expanding up to 170 degrees.

3.IP rating

IP rating used to define levels of sealing effectiveness of electrical enclosures against intrusion from foreign bodies (tools, dirt etc.) and moisture. IP ratings are made up of two numbers. The first number is expected to be six. This means the device is protected against dust. The second number is its water rating, which you need to be a three at the very least (rated for heavy rain), though we recommend finding something with a six or higher. For example, IP68 guarantees protection in water up to 1.5m deep for half an hour and is resistant to dust. The number 6 stands for the highest level of dust-proof performance, the number 8 stands for the waterproof performance of more than 1 meter depth .

4.Park line making

Making park lines helps to improve safety when park car.

[Pumpkin backup cameras](#) are also featured by night vision, waterproof, wide view angle, and on-screen guidelines.
