

# Pumpkin 7 inch Octa-Core Double Din Android 10 Head Unit

This is the [Pumpkin 7" Android Car Interface](#), a device that you can push straight in to your cars head unit, replacing your current car stereo.

Lets check out it's sepcification:

It comes with Android 10, this is great as you can use Android Auto and any of the latest apps available on the Google Play/Marketplace. It is Octa-Core with 4gb of ram. Inbuilt memory is 64gb. It's touch screen, had adjustable colour settings and you can tune in to UK radio stations as well.

As well as it's specs, there are a few things that are inbuilt and these features seem to be mainstay on these devices and this is no different.

**Mirror-link** you can watch what is on the Pumpkin device on your smart phones, either via wifi or usb mirror. With usb

connection you can control the Pumpkin but on the wifi connection you can only watch what it is showing.

**GPS** which is inbuilt, so you can use online maps like iGo, Google, Copilot, etc and it gives voice guidance, this also depends on the application you use for your maps as they all differ a little.

**AV Output** means you can link to other displays or tablets that you can put on your headrests for the rear passengers, we didn't test this but it's a good feature if you have a family car.

**USB/SD** storage so you can add your biggest collection of music, movies, audio books, extra maps and much more.

**DAB+** radio, as well as FM/AM, you can connect to your favourite digital radio station, like BBC Radio 6 in the UK which is digital only.

**OBD2** means that you don't need a car diagnostic tool, you can solve some errors using this device

**WIFI/3G** support, as it's an android device means you can connect to local network or even wifi connections.

**Cam-In** allows you to link a camera, for the front or rear of your car to help with parking.

There it is, the full 'plug n play' set up that you get when you purchase the device. Make sure you check the size of the available space in your cars head unit/dash area to make sure this fits. With the device you get instructions on how it all works and fits together.

# Amazing head unit for the price wow awesome !

## Android 10 PUMPKIN CAR DVD STEREO

I replaced my blown out head unit on my 2006 Volkswagen Jetta which was an aftermarket [Pumpkin](#) product with this [7 inch double din head unit](#). First of all, the cost is amazing. I didn't know much about this brand of electronics, but I did some research and read the reviews. I decided to purchase it and I was glad that I did this unit is fantastic. The graphics and the simplicity of usage is awesome and the install was fairly easy. I had his head unit installed by a professional installer, the geek squad at Best Buy along with a sub woofer an alpine power amplifier, and this unit sounds so nice. The DVD that you play back on this is awesome. The graphics though the resolution amazing. I would definitely buy it again and I would highly recommend it to all my friends and family. I have gotten a lot of complements not only on the head unit but the sound quality it is a powerful head unit with lots of power to spare. And especially with the amplifier and sub woofer well, what more can I say amazing great price.
