Android 5.1 Car Stereo GPS

1024*600 Double Din -RQ0267E

IT`S A LOT MORE THAN JUST CAR STEREO

First of all I want to Thank [Pumpkin](#) Customer service. They

are really helpful, I had some problem with my order and they have helped me very fast. Thank You!

OVERALL ABOUT PRODUCT

This review will be about [Android 5.1 7- inch 1024×600 Android Quad Core](#) Car stereo.

There are few [Pumpkin](#) car stereos available, but I chose this android car stereo double din because I like how it looks and also screen resolution was very important to me. Screen quality is very good, touch screen – very responsive and picture quality – amazing. Just what I wanted! This is my second [Android car stereo](#) in my car. I have two Android units in my car – one [Pumpkin](#) double din and another custom made Nexus tablet, one for navigation and another for entertainment.

Quality for the price is very good. Everything works as it should, as my oem radio. When you will start car it will continue to play track, or will jump to same radio station or any app you have used, before you have switched ignition off. Navigation also works very good. I have downloaded google maps offline maps. And also GPS signal is very good, even with GPS antenna hided under dash.

I could not find anything very negative about this [Pumpkin](#) car radio yet. BUT little improvements would make this unit more premium:

- Screen feels a bit plastic. – glass screen would make this model more premium – also to look and feel more expensive.
 - Better integrated EQ – easy fix is to download better from Play store.
 - MORE Launcher THEMES – also there many launcher apps in Play store, but not many people know how to install them.
-

FITTING

I have managed to fully fit this unit in my Avensis in 1 hour, but I still have some problems with fascia. I have to make some modifications to make it look nicer. Unit came with all

necessary cables, exactly same as you can see in product page pictures. I have bought Steering Stalk Control for my car to connect steering wheel controls to Pumpkin stereo. And everything works perfect. You can also set function for every steering wheel button individually in settings.

Most important FUNCTIONS

- APP resume when you start car.
- Screen brightness changes when you switch light on/off.
- You can set time after how many minutes unit to shut down after ignition switched off.
- Bluetooth hands free calls – It connects automatically when your phone is in range. Call quality is very good even without external mic. You can change to auto answer calls in settings.
- Steering wheel controls – works very good. Not expected to be so easy to connect. Plug and Play. (if you want to connect steering wheel controls just buy Steering Stalk Control instead of wire harness for your car)
- Easy change button LED light colors to match other interior buttons.

Kundenmeinung auf Pumpkin Android Autoradio 5.1 Doppel Din-RQ0268E

Mit dem aktuellen [Pumpkin Android 5.1.1](#) wird das Gerät als [RQ0268E](#) geliefert!

Durch die Modellnummer in der Beschreibung nicht täuschen lassen!

Oder bei Zweifel den Verkäufer anschreiben, die Antworten kommen umgehend!

Herausragender Support vom Verkäufer [Autopumpkin](#) sowie vom Pumpkin Forum!

Sehr schnelle Antworten (trotz Zeitzone China!).

Bootzeit unter [5.1](#) ca. 25 Sekunden!

Einrichtung (auf dem Schreibtisch, wegen mehr WLAN Speed für die Navi Karten) in kurzer Zeit erledigt.

Navi- / Tankstellen- / Media-App geladen.

Als Navi habe ich Sygic in einer alten Version (14.3.4 gefällt mir am Besten!) installiert! Vom Start der App bis zum Beginn

der Navigation vergehen nur wenigen Sekunden!
Genial große Anzeige, sehr schön konfigurierbar und auch sehr performant!
Man kann die Sygic-App samt Karten auch auf die GPS-Card verschieben! Funktioniert einwandfrei!
Angemerkt: Die Navi Sprachansagen können im Radiomenü unter GPS gegenüber dem "Mediensound" angepasst (Mischen / Ausblenden) werden! Sehr schön!

Als alternativen Launcher nutze ich derzeit CarHome Ultra!

Noch ein Wort zu EasyConnect:
Dabei handelt es sich anscheinend um ein eigenes Mirrorlink.
Über USB Debugging werden 2 Apps auf dem Phone installiert.
Ein EasyConnect Server und ein Launcher Yijia (siehe Bild).
Darüber kann man 3x6 Shortcuts anlegen, um beliebige Apps starten zu können.
Der Screen wird dann auf das Radio gespiegelt und man kann darüber das Phone "bedienen"!
An sich eine schöne Idee. Dabei muss allerdings der Bildschirm des Phone eingeschaltet bleiben.
Und dabei entlädt sich mein G4 schneller, als es über den USB geladen werden kann.
Also nicht wirklich nutzbar. Ist aber auch nicht schlimm, denn die Probleme (usw.) mit Mirrorlink waren für mich der Hauptgrund überhaupt ein [Android](#) Radio anzuschaffen! Also kein Beinbruch.

Auch wird ein USB Stick 128GB problemlos erkannt! Nutze den MortPlayer (Car Mode!) als Musikplayer! Erkennt mehrere einzulesende Ordner! Z.B. Ordner auf SD-Card / GPS-Card / USB Stick! Genial & einwandfrei...

Da es beim RQ0268E keine Kontakte App gibt, ist bei der Zieleingabe erstmal eine manuelle Eingabe erforderlich.

Ich habe aber auf dem Android [Autoradio](#) eine Kontakte-App gefunden, die man "erneut" installieren kann! Dazu habe ich die App mit MyPhoneExplorer "rauskopiert" und einfach erneut installiert! Anschließend hat man auch eine Kontakte App in der App Übersicht und kann sie wie gewohnt nutzen! Der Rest wie Google-Kontakte-Sychronisation, Kontaktespeicher usw. war vorher bereits vorhanden.

Die Google-Kontakte tauchen dann auch sofort auf und können genutzt werden z.B. im Navi (Sygic) als Zielkontakt!

Einträge aus dem BT-Adressbuch funktionieren bei mir als Ziel im Navi nicht!

Schade, dass es nicht im Werksumfang eine "sichtbare" Kontakte App gibt, hat sich [Pumpkin](#) was dabei gedacht? Hmm...

Einbau in einen Outlander II schnell und problemlos.

Passt sogar in den Einbaurahmen ohne weitere zusätzliche Blende.

CAN-Bus Adapter eingesetzt, Tasten am Autoradio GPS programmiert, geht auch!

Radio-Empfang ist mittelmäßig. Da habe ich einen Antennenverstärker zusätzlich eingebaut. Damit ist der Empfang besser!

Bislang klare Kaufempfehlung und auf jeden Fall ein Fortschritt im Vergleich zu Mirrorlink-Radios (Sony XAV-602BT) !

Customer Review on Pumpkin Andorid 5.1 Car Stereo Double Din-RQ0268E

Purchased the [Pumpkin Android 5.1](#) version without a [rear view](#)

[camera](#) or navigation software included.

Installed in a VW Passat B7 ('11 reg)

The first thing that struck me is the build quality of the unit – very well made and easily on a par with the basic VW factory unit it replaced.

There are no installation instructions included but the process is very straightforward. It took me about 20 minutes to remove the factory unit and install this android car stereo 5.1 with basic connections (main loom, aerial and GPS antenna). If you are running cables for other accessories like iPod, re-review [camera](#), subwoofer... it will take considerably longer.

It's worth mentioning that the blue cable which comes from the aerial connection needs to be connected to the blue cable labeled ANT which comes from the main loom. Just strip the wires back, make a secure connection and lap with electrical tape. If you don't make this connection the car stereo radio probably won't have any reception!.

The fit in the dash is very precise and snug. There are no gaps and all edges line up perfectly. There is no branding on this android car stereo gps so it really looks like a factory fit.

In operation the screen is bright, clear and responsive and the sound quality is warmer and clearer than the factory unit (at least to my ears!).

I installed the Co Pilot navigation app from the play store and downloaded the maps to a micro SD card fitted in the front panel. Hey presto, built in fully custom sat nav!

I've also added the DAB box which is easy to fit, works as it's supposed to and provides a fairly inexpensive route into DAB radio.

The only slight niggle I have is that the screen doesn't automatically respond to light levels. It's does however switch on the button illuminations and change the map colours to the selected night map when the headlights are on.

I have to say that I'm over the moon with this [android](#) car stereo double din. I dread to think how much a factory system

which came anywhere near this in terms of functionality would cost. It also looks the business!
All credit to [Pumpkin](#) for a superb product.

–by RM

I really love this android [head unit](#). I got the one without reverse camera, so I can't comment on that, but all the other features work perfectly. Installation took some time but that was due to the built of my car (Peugeot 107), not fault of the unit. The wiring was straight forward and easy to connect.

The touch screen is very responsive, even though I haven't removed the protective film yet. The OS is very fast, all apps open straight away.

I love the fact that it's android, the whole thing is familiar, works pretty much the same as my phone. Connecting to the internet was easy through my phone's 4G. I even downloaded netflix to try streaming movies and it worked perfectly. I also tried watching movies from SD card, and the picture quality was strikingly good.

I'm well pleased with my purchase, the pumpkin certainly delivers a lot for its price.
