

Customer Review on Pumpkin 10.1 Inch Car Headrest DVD Player Multimedia Player Raspberry Pi Monitor with HDMI Port and Remote Control

Maybe you're looking for a suitable [auto dvd player headrest](#) for your kids to get rid of the boring long road trip. But there're too many [headrest monitors](#) in the market and you're really not sure which one to pick up. Then you should listen to what our customers say about our [headrest dvd player for car](#). Then you will have a decision.

[10.1 Inch TFT LCD Wide Digital Screen Ultra-thin Car Headrest DVD Player Multimedia Player Raspberry Pi Monitor with HDMI Port and Remote Control](#)

After Installation:

I was searching for a long time for an [overhead headrest DVD player](#). I had one in mind, but it got discontinued. All others were ridiculously expensive or poorly rated. Then I came across this. A lot of worthy excellent reviews. I purchased the 1003 that is 1080P capable with IR headphones.

Install was a breeze. I found a You-Tube video that was 44 seconds long, and literally, that's how long it took to install.

Since then, it's been a hit with my 4 year old.

I've had no issues with it reading DVD's thus far – granted they have been only consisting of Caillou and babyeinstein.

The big test will be this week when we go on vacation, but I have confidence that this will help getting us through the upcoming 6 hour drive.

Worth every penny.

PS. One minor complaint, the Finger lip that you use to lift the dvd off the spinner is a little small, so it can be sometimes a little difficult removing a disk from the player.

-by Joe

Tried many mobile car tv's before this and they all didn't fit well on the back of the front seat. They either wanted to fall, velcro was weak, or needed to buy an additional kit to hold the tv. Bought this one and it is what I should have

bought for my child in the first place. This one locks into the 2 headrest metal rods and doesn't move. The screen faces down to change the cd on the back then close then screen goes to upright again. Child can't mess with the buttons as much nor kick the screen as much as the other walmart brand screens. You can even play a video game on this, which I guess is a plus. The only downside is it doesn't have an internal battery which is fine for me and the remote buttons are so many and tiny. Otherwise it does exactly what it needs to do for a child to watch cartoons and not be a hazard in case of an accident and the screen falls. The screen might still fall but will be much harder to fall than the velcro ones. That's my disclaimer. Enjoy!

[Customer Review on Pumpkin 10.110 inch Car Video Headrest Monitor](#)

[Auto Pumpkin](#) does not only offer [autoradio gps dvd players](#), but also supply the high quality [Car Video Headrest Monitors](#). We have different kinds of car video monitors, such as ceiling headrest video, backseat style car tv monitor, tablet headrest dvd player for car.

And our customers also love some of our car headrest very much.(yes,they don't love them all)One of the adorable head rest dvd player is this [10.1 inch TFT LCD Wide Digital Screen Ultra-thin Car Headrest DVD Player Multimedia Player Raspberry Pi Monitor with HDMI Port and Remote Control](#):

Our customers also send us many photos after their installation to express their satisfactory.

Then what do our customer say about this adorable unit?Come to view together:

On a quest to find a [portable media car dvd player](#) for my kids that I could use in my vehicle, I finally stumbled across this outstanding headrest monitor. After purchasing 2 other portable media players, and both being defective, and having to be returned, I discovered the [Autopumpkin](#) 10.1 inch digital

media screen. The first thing that stood out was the brilliantly designed adapter bracket used to attach the media player to the headrest. Unlike the cheap straps that the other media players used, this design, included an adapter bracket, that easily snapped onto the headrest posts and did not obstruct the actual headrest for the front seat passenger or driver. The screen then easily attached to the adapter bracket, providing a clean look. I also liked how easily it could be removed and reattached to the bracket in event the screen needed to be taken out for any reason. It also allowed the ability to vertically tilt the screen for optimal viewing. When I turned the media player on the first thing that stood out was the screen quality. Not only was the screen slightly larger (10.1 inches vs 9 inches or 7 inches) and flatter than most other portable players, the resolution and visual quality was outstanding. I liked how quickly a dvd disc booted up as well. There was no long waiting for it to read the disc, nor did it have any trouble reading a disc. Also another great aspect to this player was despite visible vibrations when attached to my seat and driving down the road, the disc never skipped once.

Though I have not been able to experiment with all the features of this player, what stood out was the number of available options. After thorough research, I could not find a portable media player that included all the features that this one did. I won't list them all, but the features that this player included that stood out most to me, were the HDMI input, media card reader, the resume playback feature, and the remote control. Most players priced in this range exclude most of these features that I listed. Though not applicable to me at this time, this player included other great features like FM sound modulation, IR headphone support, AV ins and outs, and even included a video game disc with the remote doubling up as a controller!

In conclusion, I would rate the NAVISKAUTO 10.1 inch portable media player five out of five stars. You simply will not find a better quality product, with more features, and in this price range. My only criticism of this product is that the unit's built in loudspeakers are not loud enough, even when the volume is maxed out. I only mention this because my child is too young to want to use headphones and rather than play

the audio through my vehicles speakers, I like to listen to native audio sources in the front of my vehicle while my child is watching a movie in the back. Between my native audio signal and road and wind noise, the speakers on this player were not quite loud enough. That is a minor gripe that will change when my child is older and will prefer to use headphones. Finally, this product is such an outstanding value, that I will be purchasing a second unit for my youngest child, once they are old enough to utilize it, in about a year.
