

Make Google Maps Talk to You in the Car

Google Maps is a usual application developed by Google. It offers satellite imagery, aerial photography, street maps, 360° interactive panoramic views of streets (Street View), real-time traffic conditions, and route planning for traveling by foot, car, bicycle and air (in beta), or public transportation. To get easy, it adds “Ok Google” voice command activation for hands-free directions. This is very helpful especially when driving. [Pumpkin head units](#) also support the google maps voice control.

To use the Google Maps voice control feature on the head units, you need to pair your mobile phones to your vehicles. Generally, Bluetooth and AutoPlay dongle are the two different kinds of connections. After connection, you can open the navigation and start to use the voice control to the app to take you somewhere.

Customer review on 7" Android

9.0 Car Stereo Radio for Opel

I bought this unit for an old vehicle: Zafira B. I did have some issues fitting it, but customer services were fast to respond. It turns out that I needed to remove a bracket at first, which was causing issues.

The unit has operated well, a week in, and although I have not connected everything (DAB+ unit) it was a bit awkward to get it all in. I guess I could remove some dash to fiddle easier, but time is fairly premium at the moment.

Being able to play my Spotify through this unit is excellent. You can download your music library using the Wi-fi outside your home and it downloads quickly. Adding My google account to the car and being able to check email, my calendar, and even watch Youtube through it is great. The head unit is fairly responsive and like I say the sound quality is really good, A lot better than the standard head unit. Using My phones Mobile WI-FI Hot spot takes this unit to another level. Connected to Bluetooth I can make and receive calls and what makes it a great is the combination of the Android operating system which runs all applications well. I am very happy with the Unit and the customer support I have received.

Great customer service though!

Rotating touchscreen head units

Rotating screen is used heavily on laptops, DVD players, phones, etc. But it is also used on head unit now. The main advantage of the rotating screen is its adjustable viewing angle design. It makes the screen can be freely rotated to effectively to avoid screen glare and makes this cost-effective car stereo more splendid by offering clearer, consistent images from all viewing angles in stable response

time and without bringing lighten or tailing when being touched. Pumpkin has released two kinds of rotating screen head units, one is 1 din head unit, another is 2 din.
