

How do iPhone connect to headrest DVD player via HDMI

Connect your iPhone, iPad, or iPod touch to a headrest DVD player, it needs an Digital AV adapter and an HDMI cable.

Steps:

1. Connect an HDMI cable to your headrest DVD player.
 2. Connect the other end of your HDMI cable to your Digital AV adapter.
 3. Plug your Digital AV adapter into the charging port on the bottom of your iOS device.

Affordable infotainment system

Honestly for the price its a [great unit](#) that will do it all, but you do get what you pay for so the price point is the reason for my 5 star rating.

This is a sleek and easy to install unit. As long as you have the basic tools for electronics you will be able to install easy. Great GPS as well helped me on a 3 hour trip today.

But what is most important about any product is the service you get after. Pumpkin was very quick to resolve a few slight problems I had. Their employee Chloe, that i worked with, was very polite, prompt and took care of my problems. I was very very surprised with how well the interaction went. So what I am saying is, If your on the fence about this unit, buy with confidence, because if you were to have a problem you will have great support to assist you. Would recommend the product and the company. A++ in my book. Well done.

Decent quality and valued unit

Quality unit that works as advertised. Works well with other car launchers like Agama and Car Launcher Pro. I recommend PowerAmp media player although I'm still figuring out getting the PowerAmp EQ to work properly.

I was slightly skeptical about ordering one of these. But I decided to take a gamble and so far I'm pleased with the unit. Touch sensitivity and response is right on point. It's fairly easy to operate and more customizable than I figured it would be. It's basically just a big cell phone in your vehicle.

Upgrading from a 7" Android head unit to this 10.1" unit I had the advantage of experience with the OS and different car launchers. Take your time and research the capabilities of this PX5 Android head unit and you can do almost anything you want, car stereo-wise. Have fun making your car stereo experience your own.
