

# 7 Factors You Need To Consider Before You Buy A Car DVD Player

If you're shopping around for a car DVD player, you will find a checklist to be an immensely useful tool to have on hand. From going over the kinds of in-car DVD player you want to identifying all the components and accessories that come bundled with the package, you'll have a much easier time getting exactly what you want for your car DVD player:

**Type of [Car DVD Player](#).** In-dash DVD players, rear-mirror DVD players, [headrest DVD players](#), portable DVD players – there are a lot of options out on the market. Identify which one will best suit your in-car viewing needs.

**Smart Options** – you can pay a little extra cash to pick car DVD players with smart capabilities, such as an [Android Car DVD Player](#). These mini PCs allow you to do so much more than just watch movies, like install apps or play games. They will cost more than their 'dumb' counterparts though.

**Internal/External Storage Options** – while the primary purpose of car DVD players is to play DVDs, you can also pick models that can play movies from USB flash drives or SD cards. Some players can even store the movies in internal storage – letting you play movies even when you don't have your library of DVDs with you.

## Quad-core Cortex A7 Processor

It is the latest Quad-core 1.6GHz, support built-in WIFI, the system performance has been improved to unprecedented quick and accurate level.

DDR3 1GB RAM	CPU 4-Core	16GB ROM
--------------	------------	----------

**Media Format.** .AVI, .MPEG, .MP4, .MKV – check beforehand the

media formats that your in-car DVD player can play. This is especially important when choosing players that will work with storage media besides DVDs. This is less of a problem with smart players though, as you can just install the proper codecs to ensure that it can play whatever media format you have in mind.

**Power Source.** Identify where your player will draw its power from. The cigarette lighter receptacle, power cables from the dash, or cables connected directly to the car's battery are the most common power sources. Bonus points for DVD players with batteries, as they can run even while the car is turned off.

**Connectivity.** Some car DVD players have audio jacks that let you plug in headphones or earphones. Others have Bluetooth that let you use a variety of wireless devices, such as headsets or game pad controllers. Taking note of the connectivity features will help you identify the devices that you can pair with the player.

**Packaged Components.** Wires, brackets, speakers, controllers, antennas, tuners, cleaning kits – you need to check what the package actually contains. This will help you better determine if the car DVD players come with the features you're looking for or if you'll need to spend extra procuring the accessories and components on your own.

Keep this checklist with you while shopping, and you'll be able to better understand what kind of car DVD player you've set your sights on!

# Make Sure That You Get the Best Car Stereo in the World

Sound and music are very important to most people and this is why you need to get the best car stereo that you can get your hands on. If you are able to obtain the best that there is on the market, you will have hours and hours of musical pleasure. Many people find that music and songs calm them down, when they are stressed or worried. Although there are many different types, models and sizes of car stereos on the market, the truth is that shopping around will prove extremely beneficial. If you put in a little bit of effort and patience the reward may be you driving around listening to the best car stereo that money has to offer. ❌

You need to know that different companies may tell you different information with regard to stereos. This is another

reason why it is important to shop around and obtain the correct information. It is suggested that you choose a stereo that contains high levels of outputs. You should make this choice, if you are planning on adding an amplifier at a later stage. You may also want to choose a stereo that also contains low level outputs. It also has been suggested to choose a stereo which contains a fader so that you will be able to adjust the volume from both the front as well as the rear speakers.

There is nothing better in life, than driving a car that goes well, and having a wonderful stereo blasting your best songs. [Car stereos](#) can actually get quite expensive due to all the different parts that make up the totality of the stereo system. When it comes to your car you want to drive something that is both safe and reliable. The same concept can be applied to a car stereo, which is that when you are listening to your stereo you want it to be the best car stereo that money has to offer. If you are one of those people who are always striving for the best of everything in life, then [buying a car stereo](#) should not be an exception.

The quality that you want may be dependent upon your individual needs and requirements. The majority of people are all very different with regard to stereo players. Some people may want a luxury car and not worry that much about the type of stereo which they have. Other people may not be fussy with regard to their car that they have but may be very fussy when it comes to their stereo. The great aspect about living in today's times, when modern technology has advanced to such vast degrees is that you always have many options. There are many different car stereos available on the market, which contain all different types of features. At the end of the day if you want the [best car stereo](#) that money has to offer, then you should determine how important music and sound is to you when you are driving in your car.
