

How to Set Up a Car DVD Player for Your Car

If you have kids, take your car on long trips or enjoy camping, you may wish to install a DVD player in your car for entertainment on the road. You can purchase car multimedia player and LCD screen, or just a plain DVD player to use with existing LCD screens in your car.

Steps:

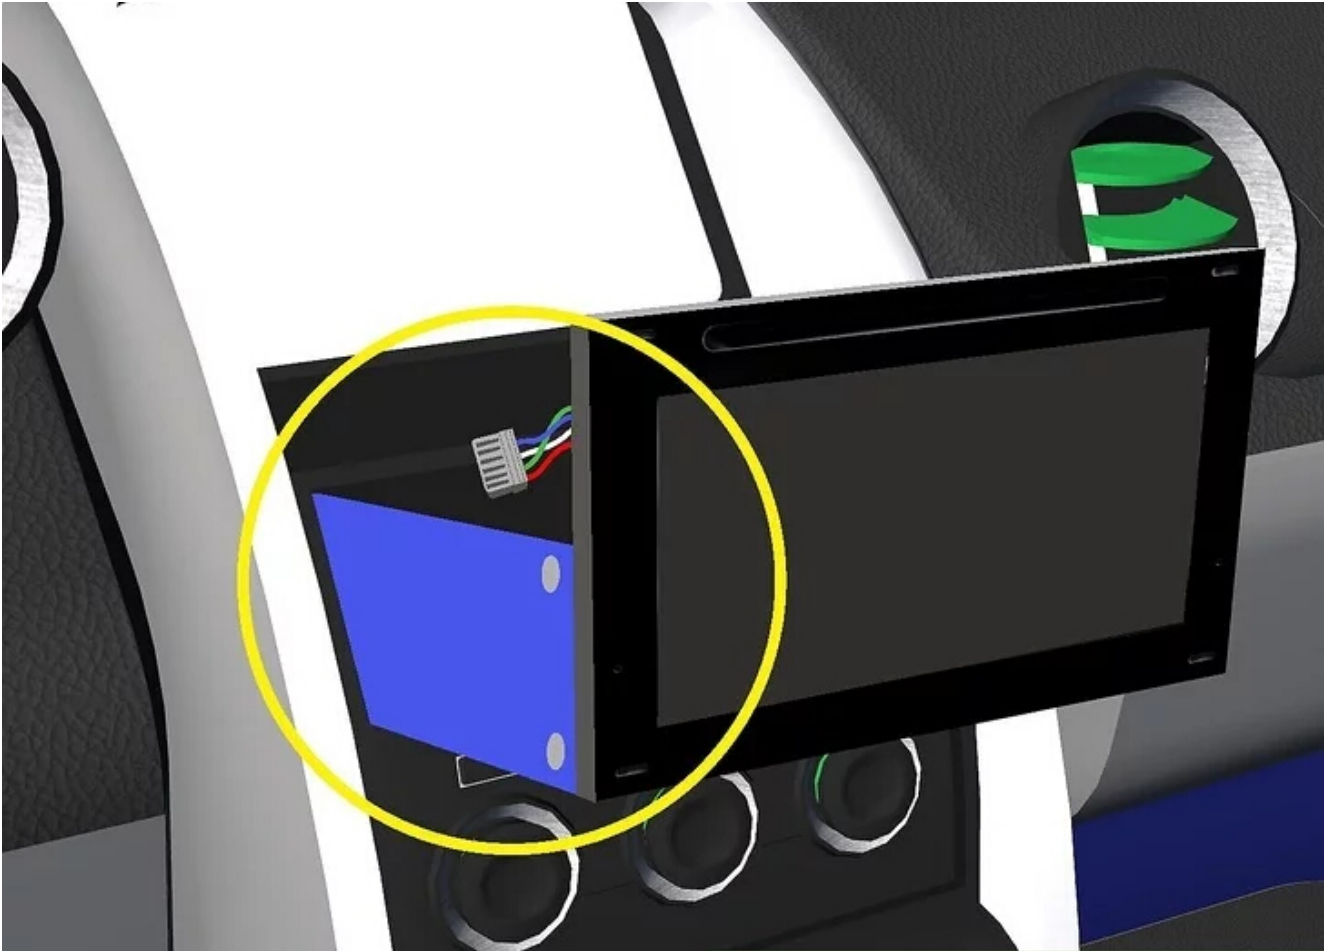

1: **Open the hood of the car and disconnect the battery.** You can disconnect the negative cable only and still be safe, but it's best to disconnect both the positive and the negative cable.

2: **Using the proper screwdriver, take out the screws holding the factory stereo in your car's dashboard, then remove the stereo from the dash.** You may have to remove parts of the dash to take the stereo out.

3: **Carefully remove the connectors from the back of the stereo.** Check the connectors to make sure they're not broken or dirty.

4: **You can buy a wiring harness designed for your vehicle at a car audio and video equipment dealer; these are intended for aftermarket installations.** Connect the wiring harness to the car's connector. See the wiring harness instructions for the proper connection.

5: **Insert the car DVD player in the aftermarket installation kit head unit.** All dashboards are different, so you must buy an installation kit that matches the make of car.

6: Connect the other end of the wiring harness to the back of the car DVD player. Connect the antenna cable to the antenna input on the back of the car DVD player.

7: Insert the car DVD player and the installation kit in the car's dash. Put in any screws that are required and replace any dash panels that you removed.

8: **Replace the battery cables and make sure they are tightened.** Close the hood and turn on the car. The [car DVD player](#) panel will light up if the installation was successful.

[Car Stereo Installation For Beginners](#)

The installation kits and guides for [android car stereo systems](#) are handy and helpful not only for beginners but also

for those who want to try their hand in doing small repairs or remodeling.

Installation may mean adding new features or replacing the stock audio system. You can customize the stock audio system of your car by replacing the stereo, speakers and amplifier with those of your choice.

Before actually starting the installation task, double-check that you are in ready possession of the needed tools, like screwdrivers, wire stripper, crimper, wiring ties, butt splices, the dash bit, etc. In some cases, you may require an antenna adapter. These are readily available with your stereo retailer.

The best way to install your car speakers, stereos, amplifiers etc is to follow the instructions given in the instruction manual. Every car has a specific model of audio system. So, plan what best you can install in your vehicle.

In most cars, the front speakers are preferably round, while the rear speakers are oval. It is better if you choose to retain same stock location for speakers, to avoid breaking the door panel or the retaining dips in case of removing speakers installed in doors.

Basically, [car stereo installation](#) includes radio installation, front speaker, rear end speaker installation and the selection of equipment.

You can upgrade your car stereo system and install equipment with better features. For example, you can choose a head unit with remote control and a rigid face.

The head unit is the mostly likely part that is upgraded whenever there is any new arrival in the market. After all, the speakers and stereos determine the quality of sound

produced.

Some of the other components which are upgraded in a high-end car stereo are amplifiers, alternators, cables, audio processors, woofer enclosure, equalizers, DVD, navigation etc.

You need to constantly upgrade the alternators according to your vehicle's current capability in terms of the electrical system. If you want to install very large audio systems in your car, then you may need loads of batteries to control fluctuations in current flow and thereby enjoy your favorite music for longer periods. You would not run out of power.

In the US, to assist you in [high-end or custom car stereo](#) installations, there are a couple of learning centers, namely The Syntec Technical School and Mobile Dynamics.

If music is your passion, then install an audio system perfectly suited to your car and listen to your favorite music endlessly.

Car Stereos provides detailed information on Car Stereos, Car Stereo Systems, Car Stereo Installations, Car Stereo Speakers and more. Car Stereos is affiliated with [Wholesale Car Audio](#).

[How to Make Your Car Spotless Like a Professional](#)

Making your car spotless and clean is not so easy. You must be do it in professional way then you can do it otherwise it will not possible. Well, everyone must know about some techniques to clean their car and make their car spotless. Are you looking

for refurbishing your car by yourself? Then it is a good option you can do by learning just a few tactics which are just precautions for you to follow. If you want to keep your car's good spark, then you need to take care of it. If we talk about professional, then we can say they have improved terminologies at the advanced level they know what the ways are which need to adopt for its long lasting look. So keeping its original look, we are here with some valuable tips which will let you know how to valet your car like an experienced pro? Frequent ways are in the queue to make your car condition attractive for you. If you don't want to hire professionals for Car Valeting in Leeds or nearby areas, then go ahead with the following methods by yourself.

1. Vacuum cleaner:

This will help you out to remove debris from inner parts of the accelerator or anywhere. Enough length of hosepipe will give you access to hard to reach places. Hold hosepipe carefully in your hand with the cup grip and do vacuum cleaning.

2. Cleaning plastic surface:

You can easily wipe out with Luke warm water with any detergent. Make sure the cloth which is being used to sponge should be damp. For long lasting look and protection buy any soap which is primarily manufactured for this purpose. You can have professional advice on this too.

3. Wheels Cleaning:

You need to use best quality cleaning detergent for wheels. If you get a protective sealant for your wheels, then it will coat your wheels which will be a repellent for iron material particles in brake dust.

4. Windows vacuuming:

If you do waxing and washing for your window, then you can easily get rid of stains. But avoid doing waxing on window surface because it will do blur.

5. Washing:

Pressure wash your car with the distance of 4 inches it shouldn't be close to the surface. First remove dirt from the surface then wipe out with a special cleaner and then throw water in high pressure.

6. Drying:

After pressure wash use two large clothes for drying. One of drying purpose and another one of finishing touch.

7. Polishing:

Apply some [high-quality care for car stereo](#) polishing which will keep your original vehicle look for long terms. Various excellent products are in the market to polish your car.

These are some methods which you can apply for valeting. Different hiring companies are offering valeting services for your vehicle. They will do quickly as well as with professional tools. They know how to do effectively. [Car DVD players](#) and across the areas are offering various deals for your car using effects and detailing in cost effective prices. You can have them for the betterment of your vehicle. There is not any hindrance by doing yourself but for example if you applied some low-quality car accessories then you will feel pity for yourself. So before starting to go with complete information first then use any tricks.
