

# How to choose a Portable DVD Player

Road-tripping parents who'd rather not hear the four dreaded words "Are we there yet?" from the back of the car. A portable DVD player can go a long way in alleviating the more mundane aspects of being out and about.

Films are a fantastic way to escape while on a trip, as you can easily invest in a story that will make time go by faster. We have countless DVDs of both movies and TV shows at home that we want to watch while on our trip. This is why buying a portable DVD player is a great idea for the entire family to enjoy.

If you have kids, this is a great way to keep them occupied and calm while on a lengthy trip. If you are traveling to a location without a television set, it is also a great way to end the night while watching one of your favorite films or shows. Here we are talking about some tips about choosing a [portable DVD player](#).

## **Dimensions of Compatibility**

Determine the size of the DVD player according to the place that you will always use the player. If you want the former, pick a laptop-style portable DVD player that would rest comfortably on your... well, lap. If your goal is a portable DVD player that serves as a car player, think about getting one designed for vehicular use. If so, you can go with one of the bulkier ones with a bigger screen and enjoy the larger, face-shielding viewing experience that comes with it.

## **Portability**

"What if I fly a lot?" That you may consider a portable DVD player. Not only does weight easily add up when you're cramming stuff into your carry on, but you also don't want to be fiddling around with a honking-huge player when you're taking off your shoes and emptying your pockets as other passengers give you the evil stare while going through airport security. For some of us, portable just works better for everything in our lives.

## **Region Locking**

"Why can I play some DVDs, but not others?" Film studios use regional code protection in DVD technology to protect content and to control worldwide release dates, So the DVD player will only play the media that matches the region code of that player. All other media with other region codes won't play at all. So you need to choose the right DVD player that can match your region code.

## **Battery Terms**

Most of the DVD players can play over 4h and charge for 6h. You can pay attention to the specification about the payback time before you place an order.

## The special function of car stereo-- DVD Player

Most car stereos on the market have the DVD player function, these car stereos have a DVD drive so that these devices can

simultaneously play CDs and DVDs. It allows watching a movie on the integrated screen without an Internet connection. So this kind of car stereo is essential for a long journey and it can let you take a rest.

Car stereos with DVD drive also have external connections for monitors, with which screens on the back of the headrests can be supplied with moving pictures. In this way, they make it possible to offer passengers in the back seat a cinema while driving, as has long been the norm on planes. Especially for long vacation trips with children, this can soothe and quiet them.

[Pumpkin car stereo](#) also has external connections such as AV output, USB / SD card slot for the display. Through the external connections, the moving images can be transferred to the screen on the headrest. In this way, they make it possible to make a cinema available to the back seat passengers while driving. If your long vacation goes together with children, you will surely need this function.
