How to Set Up a Car DVD Player for Your Car

If you have kids, take your car on long trips or enjoy camping, you may wish to install a DVD player in your car for entertainment on the road. You can purchase car multimedia player and LCD screen, or just a plain DVD player to use with existing LCD screens in your car.
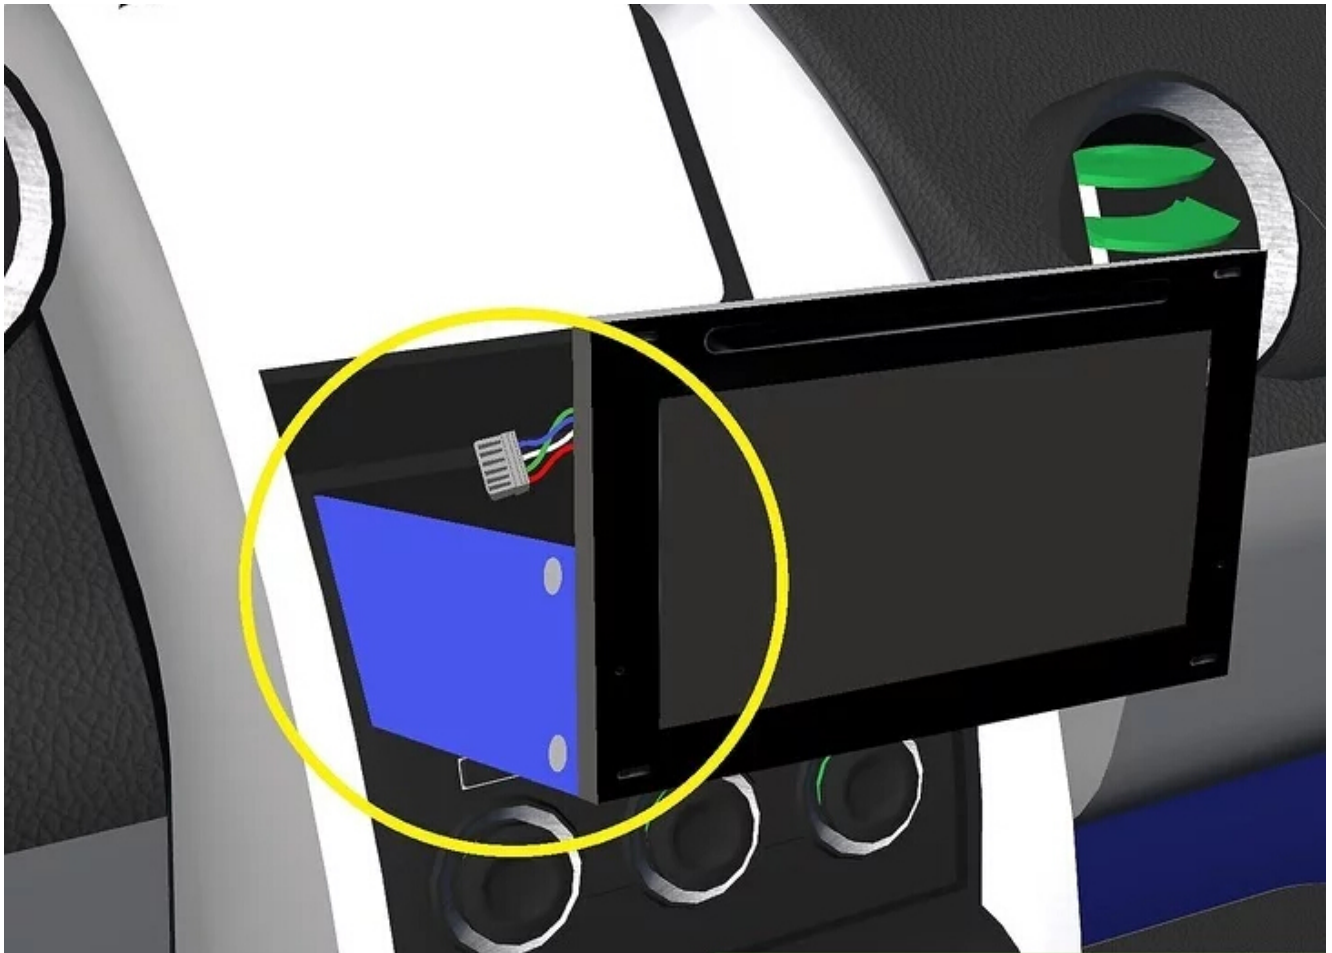

Steps:

1: **Open the hood of the car and disconnect the battery.** You can disconnect the negative cable only and still be safe, but it's best to disconnect both the positive and the negative cable.

2: **Using the proper screwdriver, take out the screws holding the factory stereo in your car's dashboard, then remove the [stereo from the dash](#).** You may have to remove parts of the dash to take the stereo out.

3: **Carefully remove the connectors from the back of the stereo.** Check the connectors to make sure they're not broken or dirty.

4: **You can buy a wiring harness designed for your vehicle at a car audio and video equipment dealer; these are intended for aftermarket installations.** Connect the wiring harness to the car's connector. See the wiring harness instructions for the proper connection.

5: **Insert the car DVD player in the aftermarket installation kit head unit.** All dashboards are different, so you must buy an installation kit that matches the make of car.

6:**Connect the other end of the wiring harness to the back of the car DVD player.**Connect the antenna cable to the antenna input on the back of the car DVD player.

7:**Insert the car DVD player and the installation kit in the car's dash.** Put in any screws that are required and replace any dash panels that you removed.

8: **Replace the battery cables and make sure they are tightened.** Close the hood and turn on the car. The car DVD player panel will light up if the installation was successful.
