

# Review for Pumpkin JY-C0662T Android 4.4 Car Stereo for Toyota

## Key Features

- Android 4.4 Kitkat OS
- Steering Wheel Control function
- 2 inch LCD HD Capacitive touch screen
- Support OBD2
- Support both 3G and Wifi
- Support Bluetooth
- Support 7 Color Button Indicator
- Support 1080p Video
- Support DVR, Reversing camera

I'll give a review of [Pumpkin JY-C0662T](#). The unit has a 6.2" capacitive touch screen and is flanked by buttons on the two side. The buttons are pretty well laid out and are easily accessible.

**Radio:** This tuner sounds just as good if not better than my st

ock Toyota radio. There are your basic auto-scan (Scan) and preset buttons for the radio stations. There is a band button (on-screen) that chooses between AM, FM and RDS.

**CD/DVD:** There's a slide in slot atop the radio for CD/DVD discs. Works as expected when you insert a CD it launches the CD player and plays the music. Basic seek and skip functionality is available and it also supports DVD video playback.

**Navigation:** The unit comes with GPS, and it functions much as you would expect. You plug in an address and it navigates a route there. You can also use Google Maps / Nav, which works but does require a data connection as the maps and routing are not done on the device, but rather online.

**Wifi/ 3G data:** There is a Wifi/ 3G cable that supports wifi (built-in) or 3G dongle (extra) to support data capabilities. If you have a phone that supports tethering, you can use it as your wifi data source.

**Pandora & Google Apps:** Because this is a true [Android car head unit](#), it supports Pandora, Spotify and Google Music, and many other popular Google apps from the play store.

**Bluetooth Phone & Audio:** You can pair the stereo with your bluetooth phone or audio device, once paired you can do the following: Dial out and receive calls hands-free via the Mic. Your phone contacts can be downloaded into the unit.

# Consumer Reviews for Pumpkin Android Car Stereo KD-C0224

## **Key Features:**

- Support car models: Universal
- Steering wheel control function
- 9.5 inch LCD HD capacitive touch screen
- Android 4.4 kitkat OS on your car DVD
- Free mic
- Support OBD2

- Support both 3G and WIFI
- Support Bluetooth
- Support 1080p video
- Support DVR

This [car DVD player Bluetooth](#) went into my Yaris without a single problem. I was able to install Waze and tether to my cell phone. Handsfree calling function works great, the stock GPS worked well, nice speed monitoring feature. This Android 4.4 car stereo warns nicely when speed limit is exceeded. I've only used it for a week, but it's been great so far.

—Review by Allen

Absolutely love this head unit. I've tried Poweramp, the standard Google music player and free play. Volume works with them all. Everything else works perfectly from the backup camera to the radio reception to tethering to my LG G3.

—Review by typelfan

Great radio, really love it. I'm using it with Shuttle, too. It makes it sound great and you can flip through artists, etc. A shame you can't control the ( old ) iPod through the radio but I found it a lot more convenient in the end to use an SD card for music anyway, so no harm done.

—Review by Julia

[This car stereo](#) is awesome! I kept debating if i want to spend this much, i bought a cheaper 250 dollar one, happened to be that it was the wrong one in the box twice...so finally i ordered this one and WOW am i glade i did even the details are AWESOME. love the graphics and everything. May cost a lot more then i wanted to spend but it was well worth it.

Just trying to get my contacts to pair over via Bluetooth, but since it may be an issue with my phone I will not rate this any lower. Over all I am extremely happy and if your questionin

g buying this radio, stop and buy it!

- 2DIN in-dash car DVD player
- Support subwoofer audio output
- Support both 3G/4G/LTE connection
- Support steering wheel control function
- Support iPod/iPhone/iPad audio input
- Support reversing camera

### Language:

English Russian Spanish Turkish Portuguese Arabic Chinese Italian German French Thai Hebrew

### **SD card:**

Other than that, I put a 64 GB SD card in it with a ton of music and pictures on it and it read it as easy as if it were a 1 GB card. If you place the MP3's in folders (band/album) then you have the folder name come up on the head unit and you can quickly browse through and find any particular song you want. You can even get it to list all the songs on the card and have it play the whole thing, although I could never listen to everything there while in my car. I believe (not certain yet) that there's a randomize or shuffle function, but I haven't had the time to try that yet. They state it will only access a 32 GB card, but I'm getting the full 64GB's I have in it. Maybe it has something to do with the type of card you're using? I bought one specifically for cameras and its read/write speeds (very fast) and it accesses the whole thing !

### **Bluetooth:**

Bluetooth on this is seamless and works like a charm. Set it for the phone and as soon as the unit turns on again... bingo – it automatically connects if you've set it up for automatic connection.

## **Mic:**

The internal mic is clear enough that other people can hear me and I have it set to auto answer incoming calls so I do not have to take my eyes off the road to get the phone to answer. Safety is the main concern. I value that over screening my calls while driving. The contacts list imported easily and calls made out are fine. I now need to incorporate voice commands to it and then try to find a text to speech app for texting... if that can even be done on this unit.

I easily would recommend this to friends and family without hesitation.

## **UPDATE:**

This head unit is a tank. They sent me the KitKat update. I followed the instructions and it went through without a hitch. My buddy just bought a high dollar Pioneer and it can't do 1/4 of the stuff this one does. Do yourself a favor... if you're looking for a good android head unit, then you're in the right place. The people behind it, while a little poor with the english language – not so bad that I can't understand them – are quick to respond, very helpful and will answer any question you can throw at them. I would not hesitate to buy another head unit from them again.
