

Five stars product with great customer service

Very happy. Already installed the [Single Din Android 10 head unit](#) for 3 weeks, runs very fast, does not heat, does not lag. I am updating my review for this company from a one star to a five-star. Very good stamping and casting quality of metal parts. Plastic is also very well made, haptic not the best, but the volume control is soft padded and is very comfortable, does not slip through. Image is TOP, colors are very good and even. Touchscreen goes without problems even Multi. I have problem with the backup camera installation, they dealt with my issues immediately professionally and took care of

everything right away..

Their customer service is second to none. I love the radio, it makes my GMC safer to back up with the backup camera. So – recommendation to buy.

Camry navigation stereo review

Android 10

Put this [Pumpkin Android 10 double din car stereo](#) in a Camry. Wasn't sure on some of the installation. Sent email to the support that they have and they replied quickly. They even followed up to make sure everything was working properly. (I was the one who didn't thoroughly read the instructions which caused me to be unsure, my answer was right in front of my face in black and white). The unit is user friendly and has awesome features. Can't wait to see what the next thing these guys come up with. Will recommend to anyone. The screen is clear and responds well!

**Surprisingly good unit for my
Ford**

Android 10

RAM:4GB ROM:64GB

PUMPKIN CAR STEREO

I installed this [Android 10 Head Unit 7" Double Din head unit](#) in a 2005 Ford Ranger. The install wasn't bad but I did have to cut out more of my dash. I had previously cut out some for the deck that was in here before. Not a big deal but worth

noting. That could be just because my truck is old too. Hahaha.

As for the unit itself, everything is great. It's very responsive. I've seen some reviews of people saying they're responsive but the video suggests otherwise. This one is very snappy with that new p6 CPU.

AM/FM works great. I use Spotify premium and download my music so I always have it. That also works flawlessly so far. I've also downloaded a large area around me in Google maps, though I do usually use my phone as a Hotspot.

Torque connects quickly and works well with my obd2 connection. I do see there is a review talking about this not working. It's possible I just happen to have the right type of OBD2 connector. I know there are some that say they may not work with Android head units.

I also ran all 3 USB connections out under my dash. It does run my charger and my dashcam with no issues.

So far, after about a week I'm VERY happy with my purchase. I was worried as there was only one review in here at the time with no written reviews.

Now for the bad stuff.

There isn't really anything bad, just different.

My biggest complaint/wish is that the music controls could be kept on the screen always. If I have torque up, I have to switch apps back to Spotify or the radio to change anything. With Google maps and Waze, they do have a Spotify interface which helps a bit.

My other gripe is that you can't seem to adjust the widgets on the home page. It has the clock and radio controls which are nice but I can't move them or even put the Spotify widget on the unit. It's not a huge deal and it just takes a minute to

get used to.

Overall, I would absolutely buy this again. I'd recommend this to anyone who is looking for an android deck.
