

# Customer review on portable CD player built-in 16 hours rechargeable battery (PC0022B)

I was extremely happy to find this player. It is well worth the price. I was very impressed by the substantial packaging. The instruction booklet is comprehensive. One thing I was confused about was the memory. When turning it off, it is supposed to return to the point where you left off. I wrote to the email address and got an answer quickly. I was turning it off by the "stop" button. For the memory to work, It has to be turned off on the side. I'm including that info in case anyone else may have the problem. I am more than happy with this player. It has a sleek look and the sound quality could not be

better. And the benefit that the company is quick to respond to any questions or issues is definitely a plus. You can't go wrong with this little gem. I am actually considering ordering a second one to have as a spare for the day when you can't find CD players.

I was very pleased with this DVD player I like the fact that it's rechargeable saving \$ on batteries. Also was pleased that it had an aux jack as I was able to use a portable external speaker for when I am doing housework or crafts. When I first received it, I walk around with it and not skip. The sound quality is excellent. I use it mostly for audiobooks but have also played music DVDs both are crystal clear.

## **[Best Pumpkin Customer Service](#)**

[The product](#) is as good as advertised. The product is not the only story behind how amazing was this experience. I lost the manual after it arrived, I got in contact with the company and they sent an e-replacement manual right away. After I broke the faceplate that serves as a trim to the radio. I contacted them again to see if I could buy another faceplate and they sent one free of charge. Not only the product is amazing, but their customer service is superb. I have them as my go to vendor for other things.

# Pretty wild Android head unit

It's a neat little unit, with a few quirks, it has insanely fast boot time, I wish the contrast was a bit better and slightly glares. I am going to try and put a piece of anti-glare film on it to see if that helps.

I would like a widget to turn on the backup camera without being in reverse. I have the following working:

- 1) GPS with voice assist using Google maps works well.
- 2) Google browser with voice assist works well.
- 3) Hot spot using iPhone working well. (I can download, I can mirror, I can browse with Chrome+Google.)
- 4) FM/AM works well.
- 5) OBDII working via BT using the Torque app.
- 6) TPMS working via USB.
- 7) Both reverse and park signals are working turning on the

backup camera.

I'm still getting to know the product and might update later as I get more experience with this [Pumpkin Android 10 Car Stereo 7" Double Din Universal type\( PX6, 4+64G\)](#).
