What's the difference of Android 8.0 and Android 9.0 car stereo?

Android was released to the public for more than 10 years. The latest version is Android 9.0 now. The focal points of this latest Android version are its intelligence, simplicity, and a heap of new, advanced and convenient features. Android 9.0 is also the latest version in the Android car stereo. But what's new compared to Android 8.0? Let's run down some of the most important changes in Android Pie car stereos.

Android 8.0 Oreo

PUMPKIN CAR STEREO Android 9.0

1.Name

Android 8.0 is officially named Oreo, Android 9.0 is officially named "Pie".

2.Interface optimization

Compared to Android 8.0, Android 9.0 is more stripped-back now. The Android Pie is more colorful, with more curves for the system. And the edges have been softened.

3.Respond speed

Android 9.0 improves response speed a bit so that Android 9.0 car stereos can run smoothly and bring a quick response.

4.Software compatibility

Compared to Android 8.0, Android 9.0 can be compatible with more software. So it will not cause many software incompatibilities, flashbacks, etc.

5.System functions

Android 9.0 has added new features, like Google unified push upgrade, deep integration with Project Treble mode, more

closed and native support for call recording, etc. But maybe some features can not be used on car stereos.

Why we choose an aftermarket car stereo?

As we all know, a car stereo can improve the driving experience. So a good car stereo is necessary. There are so many people who choose to install an aftermarket car stereo than use the original one. Because aftermarket car stereos have many good aspects which original ones can not achieve.

Price

Whether it is a high-grade version with the original car stereo or a slightly cheaper version, it is not comparable in price to the aftermarket car stereo. Aftermarket car stereo is cheaper than the original car stereo.

Appearance

In general, the panel and button design are more user-friendly and the material is slightly better. In addition, the car stereo manufacturer also meets the needs of the users and sets

some more commonly used buttons on the panel. The aftermarket car stereo is not only highly compatible with the original car but also more flexible in terms of use.

System and extended functionality

The original car stereo is still based on the WinCE system, and the system function is very single. For those who have used the smart system mobile phone, it does not necessarily meet all their needs. There are many aftermarket Android car stereos now. At the same time, the superiority of the system makes its extension function more prominent.
