

# Are car covers worth it?

You won't always be able to park your vehicles indoors, but you can protect your vehicles with car covers. The car cover is a piece of the material fitted to slip on and off of your car relatively easily, protecting it from weather, bird droppings, harmful UV rays and wear when you aren't driving it. There are many benefits of utilizing a quality car cover. The lifespan of your vehicle can be enhanced, and using one can protect the paint of your vehicle. Car covers are the most effective way to keep your vehicles safe from the elements no matter where you end up having to park them.

The following are things you will be able to protect your vehicle from by using a car cover:

- Ultraviolet (UV) rays
- Snow and hail
- Rain and frost
- Dirt and dust
- Birds and other wildlife
- Falling tree debris
- Storms and wind damage

Compared to the loss in vehicle value, the investment in a [quality car cover](#) is worth it. It can lower all of these risks efficiently.

## **Pumpkin 7 inch Octa-Core Double Din Android 10 Head Unit**

# Android 10

PUMPKIN AUTORADIO

RAM 4GB ROM 64GB

This is the [Pumpkin 7" Android Car Interface](#), a device that you can push straight in to your cars head unit, replacing your current car stereo.

Lets check out it's sepcification:

It comes with Android 10, this is great as you can use Android Auto and any of the latest apps available on the Google Play/Marketplace. It is Octa-Core with 4gb of ram. Inbuilt memory is 64gb. It's touch screen, had adjustable colour settings and you can tune in to UK radio stations as well.

As well as it's specs, there are a few things that are inbuilt and these features seem to be mainstay on these devices and this is no different.

**Mirror-link** you can watch what is on the Pumpkin device on your smart phones, either via wifi or usb mirror. With usb connection you can control the Pumpkin but on the wifi connection you can only watch what it is showing.

**GPS** which is inbuilt, so you can use online maps like iGo, Google, Copilot, etc and it gives voice guidance, this also depends on the application you use for your maps as they all

differ a little.

**AV Output** means you can link to other displays or tablets that you can put on your headrests for the rear passengers, we didn't test this but it's a good feature if you have a family car.

**USB/SD** storage so you can add your biggest collection of music, movies, audio books, extra maps and much more.

**DAB+** radio, as well as FM/AM, you can connect to your favourite digital radio station, like BBC Radio 6 in the UK which is digital only.

**OBD2** means that you don't need a car diagnostic tool, you can solve some errors using this device

**WIFI/3G** support, as it's an android device means you can connect to local network or even wifi connections.

**Cam-In** allows you to link a camera, for the front or rear of your car to help with parking.

There it is, the full 'plug n play' set up that you get when you purchase the device. Make sure you check the size of the available space in your cars head unit/dash area to make sure this fits. With the device you get instructions on how it all works and fits together.
