

Customer Review on Pumpkin 10.110 inch Car Video Headrest Monitor

[Auto Pumpkin](#) does not only offer [autoradio gps dvd players](#), but also supply the high quality [Car Video Headrest Monitors](#). We have different kinds of car video monitors, such as ceiling headrest video, backseat style car tv monitor, tablet headrest dvd player for car.

And our customers also love some of our car headrest very much. (yes, they don't love them all) One of the adorable head rest dvd player is this [10.1 inch TFT LCD Wide Digital Screen Ultra-thin Car Headrest DVD Player Multimedia Player Raspberry Pi Monitor with HDMI Port and Remote Control](#):

[10.1 Inch Car Video Headrest Monitor](#)

Our customers also send us many photos after their installation to express their satisfactory.

Then what do our customer say about this adorable unit?Come to view together:

On a quest to find a [portable media car dvd player](#) for my kids that I could use in my vehicle, I finally stumbled across this outstanding headrest monitor. After purchasing 2 other portable media players, and both being defective, and having to be returned, I discovered the [Autopumpkin](#) 10.1 inch digital media screen. The first thing that stood out was the brilliantly designed adapter bracket used to attach the media player to the headrest. Unlike the cheap straps that the other media players used, this design, included an adapter bracket, that easily snapped onto the headrest posts and did not obstruct the actual headrest for the front seat passenger or driver. The screen then easily attached to the adapter bracket, providing a clean look. I also liked how easily it could be removed and reattached to the bracket in event the screen needed to be taken out for any reason. It also allowed the ability to vertically tilt the screen for optimal viewing. When I turned the media player on the first thing that stood out was the screen quality. Not only was the screen slightly larger (10.1 inches vs 9 inches or 7 inches) and flatter than most other portable players, the resolution and visual quality was outstanding. I liked how quickly a dvd disc booted up as well. There was no long waiting for it to read the disc, nor did it have any trouble reading a disc. Also another great aspect to this player was despite visible vibrations when attached to my seat and driving down the road, the disc never skipped once.

Though I have not been able to experiment with all the features of this player, what stood out was the number of available options. After thorough research, I could not find a portable media player that included all the features that this

one did. I won't list them all, but the features that this player included that stood out most to me, were the HDMI input, media card reader, the resume playback feature, and the remote control. Most players priced in this range exclude most of these features that I listed. Though not applicable to me at this time, this player included other great features like FM sound modulation, IR headphone support, AV ins and outs, and even included a video game disc with the remote doubling up as a controller!

In conclusion, I would rate the NAVISKAUTO 10.1 inch portable media player five out of five stars. You simply will not find a better quality product, with more features, and in this price range. My only criticism of this product is that the unit's built in loudspeakers are not loud enough, even when the volume is maxed out. I only mention this because my child is too young to want to use headphones and rather than play the audio through my vehicles speakers, I like to listen to native audio sources in the front of my vehicle while my child is watching a movie in the back. Between my native audio signal and road and wind noise, the speakers on this player were not quite loud enough. That is a minor gripe that will change when my child is older and will prefer to use headphones. Finally, this product is such an outstanding value, that I will be purchasing a second unit for my youngest child, once they are old enough to utilize it, in about a year.

It can fits for:

The following car model and year are for reference ,please make sure your original car radio has the same shape as our unit.

Ford F150	2004-2008
Ford Fusion	2006-2009
Ford Mustang	2007-2009
Ford Explorer	2006-2009
Ford Escape	2008-2009
Ford 500	2005-2007
Ford Freestyle	2005-2009
Mercury Montego	2005-2006
Ford Edge	2007-2009
Mercury Mountaineer	2007-2009
Ford Expedition	2007-2009

After Installation:

I have just received this [android autoradio dvd gps](#) and installed [Pumpkin](#) for Ford. I have installed this [android double din radio](#) on 2004 Ford F-150 Lariat and also 2005 F-150 Lariat. It is exact fit for both pickups, you do not need a frame or any other part. Installation and connecting the wires are extreme easy because this [car dvd](#) comes with sockets and adapters for Ford manufacturer connection fitments. Hook up

the cables with no soldering, no cutting, no taping and no extra wire running. I kept GPS antenna above the device not even needed to take it outside on the dash or anything. Very good reception. This [Pumpkin car stereo](#) is extreme fast and very responsive. Touch screen and everything is just perfect, i mean i cannot explain how happy and satisfied i am with this product.

I am also going to install esky [back up camera](#) with wireless receiver and transmitter. For that reason i didn't close up the dash frame completely yet as you seen in my photos.

-by Yalcin

I installed this [doubt din navigation radio](#) like in minutes. All plug n play. My car is a 2005 Ford Freestyle.

Issues I had was Mirrorlink, but I got an link for an update and works fine.

The radio covers lots of Ford cars, but the one issue is the Can-Bus adapter. Some will get reverse sense for backup while other need to wire to reverse wire(Me). Also RES on the Freestyle is not retained. I see this as very common (Read Entertainment System (DVD)).

This I will look into when it gets warmer.

-by Old Guy

This [android double din head unit](#) came very fast and is 100 percent plug and play in my ford.works amazing awesome screen resolution.a definite 5 star on performance and installation.
