

Customer Review of Pumpkin Android 5.1 Car Stereo Double Din--RQ0264

This is my second [Android head unit](#) and I am never going back to a regular one ever. This [android 5.1 double din stereo](#) came shipped in a standard box wrapped in black plastic.

Installation was pretty straight forward if you've installed car stereos before. I'm not going into detail about how awesome Android is so I'll skip that part.

The screen looks great and so is the touch sensitivity. I was able to load all my favorite apps with no problems (Kodi, Netflix, Hulu, Waze, iHeart radio etc..). I loaded a 32gb usb

stick with some tunes and movies for a 3 day camping trip 300 miles round trip this summer and everything worked perfect for me. The built in GPS software did OK, but I mainly used Google maps or Here maps from Nokia which allowed me to download the maps for free.

I wanted to take advantage of every function this unit has to offer so I installed the backup cam, a dash cam and a [bluetooth OBD2 diagnostic tool](#).

The [backup cam](#) is quick and responsive and turns on when I shift to reverse quickly even if the unit is still booting up.

The dash cam I am using is a 1080p Logitech USB camera that I had laying around from an old laptop, this [Pumpkin Car head unit](#) recognized it the moment I plugged it in and is so far working perfectly.

The OBD2 tool along with Torque has save me many trips to the mechanic and a nice amount of money too so that was a very good investment.

As with most Android devices there are custom ROMs available for this android car gps radio on the XDA forums which the makers fix and upgrade many issues. It is almost expected of anyone using this Android unit to go read through the forums and install the custom firmwares for a better experience.

I was offered this [Pumpkin Quad Core 7 inch Head unit](#) at a discount in exchange for my honest review and so far it's working out fantastic for me.

This is my second [Android head unit](#) and I would recommend this to everyone because it offers so much more than standard units. As a matter of fact, to date two of my buddies have gone out and purchased the same unit after having seen mines and what I can do with it.

—by **Daika**

A very good [android 5.1 headunit](#) if your good with

electronics. It has so many features, i cant 9name them all. To be able to have the best experience you need a wifi usb stick or wifi hotspot. Only reason to connect your phone is Bluetooth for hands free calling.

Attention:

1.If your car has DSP or other external amplifier system(such as Bose etc.),our car dvd players do not support,after installation,there will be no sound coming out.But you can modify speaker cable to bypass those amplifier and manually connect speaker cables to the car speakers!Please turn to technician to modify if you don't know how to do it.

2.If you have factory navigation/screen fitted in your BMW cars,then our item will fit for your car,but you will need to purchase a 5M extention kit from us.If you need it,please contact our customer service before purchasing.

GPS

Map Storage Mode: Micro SD Card
Voice Guidance: Yes (Include most Languages)
3D Map: Yes
POI Display: Yes
GPS Communication Port: Auto Search and connect

AV Output

Many car radios in the market can only spread the DVD video to [headrest monitor](#).

This unit can display almost everything to your headrests,even online Youtube video or the video from USB/SD card .

Steering Wheel Control

Change the track, volume, etc. conveniently without taking

your hands off the steering wheel, which makes your driving much safer.

DAB+ Digital Radio ([Extra DAB+ box](#) required)

Digital Audio Broadcasting allows you multi-regional music with your local well-known and also new channels. CD sound quality and noise-free in excellent transmission make DAB Radio a special experience in the vehicle. Permanent increase in channels and expansion of the station area soon make DAB accessible to most of Europe.

(If interested, please buy the DAB+ box from us)

OBD2 (Extra OBD device required)

Compatible: Most of Bluetooth type ELM327 OBD2 scanner and wifi OBD2 (Search Y0004/Y0034 on our store)

Compatible Application: Torque

Display Data: Real-time data and trouble codes from vehicles computer.

(Attention: Few cars may not support the ECU reading accessing, those cars will not work this function.)

Cam-In (Extra [rear camera](#) device required)

Support reverse camera input, automatically trigger to reverse camera when reversing the car. (Only support RCA type reverse camera input).

Optional warehouse and logistics:

Orders can be shipped from German warehouse, UK warehouse and Hongkong warehouse. This makes you free of high customs tax. Orders in our US website will be shipped from Hongkong. Hongkong warehouse could provide you more auto radios and accessories.

If you're from UK, it's better to purchase from our [UK website](#), then the order will be shipped from UK. If you're from other European country, it's better to purchase from our [DE website](#), then the orders will be shipped from Germany.

Guidance before purchase:

1. Please measure the size of your car center dashboard console and make sure our stereo size is suitable for your car.

2. Please kindly keep us informed if your car has canbus and factory amplifier.

3. Please send us photo of your car's dashboard and tell me your car model and year if you could not confirm whether it will be fit and work on your car perfectly.

Professional after-sale service:

We will help you solve every problem patiently and let you experience comfortable service. Help is always on the way. If you ever have a question or a problem with any of Autopumpkin products, please feel free to contact autopumpkin@gmail.com for help.

Keep your eyes on Autopumpkin, we'll never let you down.

Your Best Trust Autopumpkin
