How to Fix a Car Head Unit That Won't Turn On

If your [car head unit](#) does not power on successfully, you can try the following solutions to fix the problem:

1. Check that the 12 volt and memory wire are connected together. This is a common mistake that can cause issues to make the car head unit fail to power on.
2. Examine your [Android 4.4 car head unit](#) plug carefully, do you see in cuts in the wiring? Does the plug look damaged? If you do see any damaged in both aspects, then replace the plug.
3. Turn on your car ignition. Some car head units only turn on, when you turn on the ignition and start your car.
4. Check the fuse in the head units fuse holder. If its blown replace it and you hopefully fixed it.
5. Get a voltmeter and check the voltage on the red color wire, the wire that supplies 12 volts to the stereo. If it slows a reading of 12 volts, then it indicates you have got a good power source and its not the problem.
6. You could have a bad ground connection. Check if the ground wire is touching the car's metal. If there is any rust on the ground terminal, get a screwdriver and scratch it off.

How to Prevent Mazda Car Stereo Theft

Actually, you have a variety of options in reducing your risk of car stereo theft. Some cost money, while others are more strategic and are completely free.

Solutions:

- Check your doors and windows every time you leave the car to make sure they're completely closed and locked. Unlocked doors and open windows pose as advertisements to thieves to target your [car stereo](#) and your other possessions in the car.
- Park your car in a secured area, such as a garage, whenever you are able to. When parking in public, park in well-lit areas that have a lot of foot traffic. Thieves target vehicles that offer the least chance of them getting caught. Cars that are in the dark, parked near an easy escape route or are isolated from the public are more likely to suffer break-ins.
- Keep the stock radio in your car if it works well and you like the sound quality. Thieves very rarely target

or steal stock radios, because they don't have much resale value. They also don't fit well in different models of cars, giving them very limited usage outside of the vehicle in which they were originally installed.

- Invest in an [Mazda Android 4.4 car stereo](#) with a removable face if you choose to upgrade your car radio from the stock model. Remove the face of the stereo and take it with you anytime you leave the car. Never leave the face in the glove box or anywhere else in the car, because people often do this and thieves will look for it.
- Consider tinted windows to help prevent thieves from seeing what type of stereo you have in your car.
