- Support OBD2

- Support both 3G and WIFI
- Support Bluetooth
- Support 1080p video
- Support DVR

This [car DVD player Bluetooth](#) went into my Yaris without a single problem. I was able to install Waze and tether to my cell phone. Handsfree calling function works great, the stock GPS worked well, nice speed monitoring feature. This Android 4.4 car stereo warns nicely when speed limit is exceeded. I've only used it for a week, but it's been great so far.

Absolutely love this head unit. I've tried Poweramp, the standard Google music player and free play. Volume works with them all. Everything else works perfectly from the backup camera to the radio reception to tethering to my LG G3.

Great radio, really love it. I'm using it with Shuttle, too. It makes it sound great and you can flip through artists, etc. A shame you can't control the (old) iPod through the radio but I found it a lot more convenient in the end to use an SD card for music anyway, so no harm done.

[This car stereo](#) is awesome! I kept debating if i want to spend this much, i bought a cheaper 250 dollar one, happened to be that it was the wrong one in the box twice...so finally i ordered this one and WOW am i glade i did even the details are AWESOME. love the graphics and everything. May cost a lot more then i wanted to spend but it was well worth it.

Just trying to get my contacts to pair over via Bluetooth, but since it may be an issue with my phone I will not rate this any lower. Over all I am extremely happy and if your questionin

g buying this radio, stop and buy it!
