- Material/quality/appearance/processing

The processing of the radio is very high quality, you notice

this immediately when you unpack it. The radio has a matte black finish. The housing is very stable, feels comfortable and has a magnesium plate on the back to stability. The touch panel which can light up in different colors, it looks unique. The radio, he has the great 8 inch IPS display and the nice tidy homescreen.

Through the touch screen in combination with the touch-sensitive buttons, the radio is really a perfect device, you can control without direct viewing.

► Technical data

The radio has a quad-core (Rockchip PX3 cortex A9) 1.6 GHz, 1 GB RAM and the internal memory is 16 GB.

With this data, the Android 5.1 system running fluidly and without problems. You can install and play current games on the radio.

The radio supports GPS (preloaded with the Google maps APP), Bluetooth, steering wheel remote control, Wi-Fi, 3 G, FM, AM, RDS, OBD2

► GPS

Through the supplied GPS antenna, the navigation runs very well. The site search takes just a few seconds after switching on and is extremely accurate. I have experienced no GPS dropouts. Together with the Google Maps app, the navigation is super easy to adjust because it works like the route planner on the PC or on the phone.

The radio has a TF card reader. This reads standard micro SD card which is used for the extension of the store. (E.g. maps for different countries)

► FM Radio

The radio works fine, it is easy to use. You can save more on the detailed program page per 8 radio transmitter on the quick dial field and 30.

► Sound quality

The radio impresses not only with its easy operation, but also by a super sound. The radio has 4 audio outputs with each "real" 50 watt. The heights are very clear and the basses have a rich sound. The sound experience that you can refine app, which is already installed on the device and change to his liking with an equalizer

► Bluetooth

The Bluetooth connection is initialized in a few seconds the first time. Next time you have nothing to do more. The phone will connect automatically when it is in range of the car. This is very handy, then the radio has a speakerphone and it is activated directly when it is connected via Bluetooth. You will never lose a thought if you get a call in the car, whether you take the phone in your hand or used but the headset.

► Wifi, Wlan, 3G

The radio convinces with extremely many high-end features. So, as a Wi-Fi access inside the car radio can build up. Friends and family can connect to it and thus surf the Internet over 3G.

► Operating system

The OS is [Android 5.1](#) lollipop. Overall the UI is very easy. You can choose between two surface design. You can personalize the radio of course, E.g. with an own background image. Of course, a highlight of the radio is that it is using the APK Installer not only di normal APPs from the play store can install on the radio, but also that there are all the apps on the Internet.

► Installation and connection

The installation of the radio was very fast, because the radio has a good fit. Just remove old radio and connect [pumpkin](#) radio with the supplied ISO cables in the DIN plug frame and secure with four screws. The complete installation is completed in less than 30 minutes.

► Suitable Cars

The radio has a 2 DIN standard form and thus fits in many cars. The radio fits many cars of the brand VW (Jetta, golf, Scirocco, Passat, Polo, beetle, Sharan, Tiguan, Touran, Amarok, caddy, EOS, rabbit)

The radio also fits some car of Seat (Altea, Leon, Toledo) and Skoda (E.g. Fabia, superb, Octavia)

The seller lists very carefully the appropriate models.

► Conclusion

Overall, the price/performance ratio of this radio is not to beat. He keeps everything he promises and touch screen can be controlled incredibly easy. He has many features that were described above.
