

Customer Review on Pumpkin VW Android 5.1 Car DVD GPS for VW Skoda Seat Passat-RQ0368E

Installation was straight forward, needed to buy a radio antenna adapter for my 11 plate scirocco as the one supplied didn't fit.. All the features I have tried work as they're supposed to.. All in all good alternative to the more

expensive branded ones on the market.

Excellent. I have been reading all other reviews before I purchased this [Pumpkin vw android](#) car dvd gps and I will say, they are very honest.

It took me about 2 hours to install the vw car dvd player that includes removing the old one.

Another hour to install [reversing camera](#) which is a great addition to the vw car stereo.

The whole package works superbly. The canbus talks to the car without any errors. I have a skoda vrs 2009.

The sound quality is on par with the previous head unit.

The [3G dongle](#) works well. Its takes a short time to connect so be patient. I am using O2 pay as you go sim. There are others you can use. I will add so pictures soon.

Overall I would definatley recommend this unit to anyone wishing to change there in car entertainment.

Very good radio for car. Cannot say there's anything it can't do apart from make a cup of tea. Very easy to use, very easy to install. Bluetooth,WiFi and everything working perfect.

Syncs to phone very well not used the [reverse camera](#) yet though as it stands out from a mile away and will probably get stolen in the places I park my car. Was expecting the camera to be small but is not. Might be able to drill a viewing hole in rear bumper and install behind bumper sum time. Bought extra [headrest monitor](#) screens as well for the rear of the car which are nice and easy to connect to the radio itself. Very self explanitary all connections can only go in the right

slots so it's near impossible to install wrong unless you start cutting wires which is definitely not needed with this system. first radio I've seen that has Google play store on it. Only problem is I'm more interested in playing with the system than watching the road, lol
