

Customer Review on Pumpkin VW DVD Car Radio Navigation System

This [Pumpkin](#) Radio is exactly as it says on the description. It fits perfectly in a 2007 MK [VW](#) Golf GTI. The fitting instructions don't really explain anything but, in all honesty, you don't actually need them. Its literally plug in

and play. The only problem I found with it is that on a standard VW radio, it has the 2 ports for the Aerial but with this, there is only space for 1 of them. The radio works just fine with just that 1. Also when the car is reversing it loads up the screen for a [reversing camera](#) which I didn't get (this can be solved by disconnecting the relevant wire). It is mildly annoying but you can still hear the radio/CD/Bluetooth music. The GPS works fine, but even if you mute it the music goes quiet when you come to a junction/roundabout. I haven't figured out how to change the back light colour yet either as it shows. The settings are VERY basic in the menu. Overall I would definitely recommend this vw car radio navigation to anyone looking for something like this. Amazing value for money!!

Fitted this to our [Volkswagen](#) EOS (2007) to replace the radio and add new options. We had a next delivery – arrived on time, nice packaging, super easy to set up and we were very surprised by the quality ☺☺ very good price as well. Gps is quick to find satellites and location. The radio is good at picking up stations – Bluetooth picked up my phone straight away and my contacts were downloaded in seconds. We can use as well Spotify Connect with my iPhone 6 Plus
