

# Customer Review on Pumpkin Wince 6.0 Car DVD Player GPS 1 Din

Bought the WinCE 6.0 Car DVD GPS Player with [reversing camera](#), really good product, stereo was easy to connect and set up, camera works great and cable was long enough for my T4 van. Radio has good reception and everything does what it says

on the tin. very happy with the stereo overall, at this price you cant go wrong.

So I bought this [Pumpkin](#) head unit for my 1980s classic sports car. Looks great has a clean look to it and reminiscent of "Becker Mexico" (in my imagination) so looks better than the original 1980s stereo.

[Reversing camera](#) was easy to fit but a little confusing to connect But nothing got damaged during my efforts (but I am relatively competent)

Sat nav is pretty good and so is reversing camera – the two main reasons for wanting to install this for me

You can set up your own wall papers – you need to store them on the Nav card not the card in the spare SD slot

Couldn't get the boot up screen to work at all – never seems to need it... (don't know what that's all about, there is no boot up time)

Quality and finish pretty good.

You can set the screen angle to 1 of 3 positions – you need to cycle through them with a button. It then remembers. Trouble is when first powered up it defaults to vertical not tilt forward so if you have an installation that leans the screen back so that it hits some part of the dashboard you have to slide the unit in after you've set up the screen angle forward and every time it then looses power you have to repeat. not normally a problem but something to be aware of – doesn't seem to mash things when it happens the screen just closes after it hits the dash
