

Customer Review on Pumpkin WinCE 6.0 Car Stereo GPS for Opel/Vauxhall

After a long back and forth, I decided to choose the [PUMPKIN](#) 7 inch 2 DIN car radio Moniceiver .

Since my car is not Opel Astra, Corsa, Meriva or Zafira, but an Opel Tigra TwinTop 2004, I was not sure if it fits. The old radio was a CD30 MP3 – standard model for Opel – also for the Corsa. Thus everything should fit. OK – bought and hoping it fits.

The pumpkin head unit came quickly. Perfectly packed.

I have just installed the radio and Lo and behold it all fits, if you have some tool.

Here's the description of what I had to do:

- The Middle top left harness of old radio had plugged slightly into to the pumpkin. Thus I had to expand something into the recess of the frame (snips – 1 min.)
- The pumpkin has an antenna adapter which out back then is something and collides with the mounting frame. Also just cut the sheet (sheet metal shears – 2 min!)
- The original plug of Opel fits! No adapter necessary.
- Micro laid
- GPS antenna installed
- All the cables in and push it inside
- IMPORTANT: the 2 DIN standard frame bought 2 euro at Amazon!
- The setting is all just
- Works fine

Positives:

- Best radio for the price!
- Everything works perfect – Navi, Bluetooth with iPhone 6, handsfree, listening to music via iPhone, radio, etc
- Looks elegant!

Negatives:

- Time is not automatically.
- The front panel is very, very closely with the bottom edge to the heating controller module, fits but push in with something.
