After Installation:

What our customer say about this dvd system for car:

I purchased this wince 6.0 gps and fell in love. I had this car dvd system professionally installed and everything seems to work fine for me. This wince car dvd fits perfectly. The [rear view camera](#) is a great feature for a small person such as myself driving such a big vehicle. With the music; the radio connects to my phone via Bluetooth. It still plays when using the navigation system or the rear view camera. The DVD feature has to be my favorite part. I have a 1 yr old so that keeps her quiet on road trips. I have yet to find something negative to say about this product.

So far so good have had unit for a day. So far I installed radio and GPS unit will do [backup camera](#) next week. It took about 20 minutes to switch radio and install GPS. very easy. Steering wheel controls where easy to map on the unit. Sound

was good. I do not have JBL sound system. My old radio wining when I used the aux function. Now everything sounds crystal clear. you get a lot for the money. The fit and finish were spot on. Will follow up once the backup camera is installed.
