

Five stars product with great customer service

Very happy. Already installed the [Single Din Android 10 head unit](#) for 3 weeks, runs very fast, does not heat, does not lag. I am updating my review for this company from a one star to a five-star. Very good stamping and casting quality of metal parts. Plastic is also very well made, haptic not the best, but the volume control is soft padded and is very comfortable, does not slip through. Image is TOP, colors are very good and even. Touchscreen goes without problems even Multi. I have problem with the backup camera installation, they dealt with my issues immediately professionally and took care of

everything right away..

Their customer service is second to none. I love the radio, it makes my GMC safer to back up with the backup camera. So – recommendation to buy.
