

Great radio- gives a different look for my car

Great car stereo transformed my 2009 Honda Fit into 2020. Latest Android 10 is key and installation was easy. Highly recommend. The level of customization one has with tons of apps compared to other more expensive brands that have limited connectivity makes this a worth buy for 2020 and beyond. Great customer service as well.

The screen is vibrant with minimum reflection, installed Sygic maps that are direct and are turn by turn real time, I can hot spot phone and get real time updates. The head unit is super versatile and astatically gorgeous. I had a small user error and support was supportive communicative and awesome!! love the company and product. Installed in my cts coupe as a floating display...

Everything worked as advertised. This monitor is huge which makes YouTube videos pop! I recommend this to anybody who wants a solid android system!
