

# How to identify different Android Head Unit Model

When I was a newbie, I often struggle to identify different Android Head Unit Models, there are unbranded or branded as [Advanz](#), [Azentek](#), [Ca-Fi](#), [Chinavasion](#), [Erisin](#), [Klyde](#), [Ouku](#), [Pixen](#), [Yeamax](#), [Xtrons](#), [Newsmy](#), etc. I even didn't have any idea for which unit fit my car or didn't know how to select them. <http://forum.xda-developers.com> is a great site, you can learn everything you want to know for the head unit. The purpose to write this article is for sharing you a great article

[http://forum.xda-developers.com/wiki/Generic\\_Android\\_Head\\_Unit](http://forum.xda-developers.com/wiki/Generic_Android_Head_Unit) to learn how to identify different Android Head Unit. Hope it can help you know more about Android Head Units.
