

How to Install Pumpkin 10.1 Inch Car Headrest DVD Player Monitor with HDMI Port

Whether you stream video on your phone, download it to your tablet, or still prefer DVDs, you can do it all in your car and enjoy the benefit of a bigger screen and stereo sound thanks to receivers and monitors with plentiful inputs.

Installing a headrest dvd player monitor is the easiest way to get the entertainment you want.

Pumpkin dvd player for car headrest have DVD players built in as well as a variety of video inputs, including HDMI ports for HD sources. If you have an all-in-one style headrest monitor for both seats, then two backseat passengers can watch their own content and use headphones for audio output. Because of the expansion possibilities of certain headrests, two units can often be wired to display video from one source, such as in-dash Car GPS DVD Players. Through Pumpkin latest android 5.1 car stereos, you can even play online video like YouTube videos on the headrest monitors you have.

Here's a guiding video taken by Pumpkin staff to show customers how to install one of Pumpkin 10.1 inch headrest dvd player-CH1003B.
