Rotating touchscreen head units

Rotating screen is used heavily on laptops, DVD players, phones, etc. But it is also used on head unit now. The main advantage of the rotating screen is its adjustable viewing angle design. It makes the screen can be freely rotated to effectively to avoid screen glare and makes this costeffective car stereo more splendid by offering clearer, consistent images from all viewing angles in stable response time and without bringing lighten or tailing when being touched. Pumpkin has released two kinds of rotating screen

head units, one is 1 din head unit, another is 2 din.
