

The special function of car stereo-- DVD Player

Most car stereos on the market have the DVD player function, these car stereos have a DVD drive so that these devices can simultaneously play CDs and DVDs. It allows watching a movie on the integrated screen without an Internet connection. So this kind of car stereo is essential for a long journey and it can let you take a rest.

Car stereos with DVD drive also have external connections for monitors, with which screens on the back of the headrests can be supplied with moving pictures. In this way, they make it possible to offer passengers in the back seat a cinema while driving, as has long been the norm on planes. Especially for long vacation trips with children, this can soothe and quiet them.

[Pumpkin car stereo](#) also has external connections such as AV output, USB / SD card slot for the display. Through the external connections, the moving images can be transferred to the screen on the headrest. In this way, they make it possible to make a cinema available to the back seat passengers while driving. If your long vacation goes together with children,

you will surely need this function.

□Pumpkin **New** **Arrival□Universal 6.2" Quad** **Core Android 4.4 Double Din** **Car Stereo**

To meet different customers' demands, Pumpkin has released another stunning **universal car stereo** ([CS-C0249](#)). Corolla 8" Touch Screen Double Din Bluetooth Car Stereo

By **Thomas Penafiel**

Pros:

- Very sleek quality looking head unit. [This unit](#) fits perfectly into my 2010 Corolla and now it looks more modern. I can't describe how happy I am.
- Radio functionality is great. Plenty of preset slots for all of your favorite radio stations, and it will tell you the name of the song and who's singing it. Besides, the radio automatically shuts off when the phone rings.
- I purchased a backup camera to use with this and the screen shows a nice clear video feed. It was also very easy to install, and auto switched when I shift the car into reverse (you need to connect the reverse wire for this to work).
- Bluetooth audio quality is good and CD player is perfect!
- You can change the boot logo from "DVD" to your car's manufacturer.

Cons:

- GPS load time is about 15-20 seconds, which seems like a long time when comparing to a factory GPS.
- Sometimes callers have trouble hearing me over Bluetooth when they call.

Overall, I'm quite happy with my purchase. Both of the cons listed are very minor and do not change my overall opinion of this head unit. I'd recommend it to anyone looking for an economical upgrade to their Toyota Corolla. Nice work, [Pumpkin](#)!
