

Customer Review for Pumpkin KD-C0223 Universal 6.2 Inch Double Din Android 4.4 Car Head Unit

This could end up being a 5-star product if I can get some of the idiosyncrasies ironed out.

-- By G3

▪ Pros:

First off: It's installed and fired up beautifully, no problems at all. **The wires are all ISO color-coded**, and I made no mistakes connecting everything (Huzzah!). **All of the applications worked right first time** --radio, GPS, Bluetooth hands-free, etc. Oh and BTW, **the GPS is amazing at signal acquisition**. I'm used to Garmin taking a while to get a position, especially after sitting unpowered for some days. But [this Android 4.4 unit](#) **found satellites and got a position after only a minute** or so, even after being shipped across 10 time zones! And it picks up a good GPS constellation even under my carport.

▪ Cons:

My current complaints are few and minor: the audio has a hiss in it, and I see that [Pumpkin](#) has a power filter (free) to solve this issue. The GPS does not seem to have a “north up” setting, which I much prefer over “track up”. Also, the existing GPS software has map colors that are very poorly chosen. It’s almost impossible to see secondary roads, and I may have to change that software before all is said and done. The physical unit is fairly large, around 4” vertical dimension, and it was a very snug squeeze in my Ford Ranger console -- but it worked.

The Android system is fairly conventional, but with all the apps and configurations, it’s sometimes puzzling as to where to find a particular setting. Time will iron this out. **Nice to have “home” buttons both on the touch screen and the push-buttons.**

▪ Overall

I’m overall quite pleased, ESPECIALLY for the price. I expect to have a lot of fun with this.
