## □Customer Review for Pumpkin□KD-C0223 Universal 6.2 Inch Double Din Android 4.4 Car Head Unit

This could end up being a 5-star product if I can get some of the idiosyncrasies ironed out.

-- By **G3** 

## Pros:

First off: It's installed and fired up beautifully, no problems at all. The wires are all ISO color-coded, and I made no mistakes connecting everything (Huzzah!). All of the applications worked right first time —-radio, GPS, Bluetooth hands-free, etc. Oh and BTW, the GPS is amazing at signal acquisition. I'm used to Garmin taking a while to get a position, especially after sitting unpowered for some days. But this Android 4.4 unit found satellites and got a position after only a minute or so, even after being shipped across 10 time zones! And it picks up a good GPS constellation even under my carport.

## - Cons:

My current complaints are few and minor: the audio has a hiss in it, and I see that <u>Pumpkin</u> has a power filter (free) to solve this issue. The GPS does not seem to have a "north up" setting, which I much prefer over "track up". Also, the existing GPS software has map colors that are very poorly chosen. It's almost impossible to see secondary roads, and I may have to change that software before all is said and done. The physical unit is fairly large, around 4" vertical dimension, and it was a very snug squeeze in my Ford Ranger console — but it worked.

The Android system is fairly conventional, but with all the apps and configurations, it's sometimes puzzling as to where to find a particular setting. Time will iron this out. Nice to have "home" buttons both on the touch screen and the pushbuttons.

## Overall

I'm overall quite pleased, ESPECIALLY for the price. I expect to have a lot of fun with this.
