

Customer review on Pumpkin 2 Din 7" Android 9.0 Head Unit for Ford

Bought and fitted it into my son's 2013 Ford Mondeo Titanium X 1.6T. All works really well and looks fantastic.

Couple of points of note.

1. The car had the Sony DAB stereo which has 2 aerial feeds. You need a Fakra to DIN adapter to connect the aerial to the new head unit.

2. I fitted the external mic that came with the kit. I ran the cable under the drivers side of the dash and up the A-Pillar. It's just about long enough to place the mic at head height on the pillar but I would have preferred to run it up to the roof where it would be less obvious. I suggest buying a 1m 3.5mm

jack extension lead if you want to do the same.

3. Shows radio station in the main dash screen.

4. I initially fitted the GPS aerial under the dash as I had done on a similar unit in my other son's Focus, but the signal was quite low. It would have probably worked but around town it may have been a problem so I ran the cable under the passenger side of the dash, up the A-pillar and placed it on top of the Dash in the corner under the screen. Signal significantly better. I only say this to stop you having to take the unit out again after putting everything back like I did!!

5. It came with 2 wiring harnesses. I used the one with the Canbus box attached to it and all works as expected. I'm not sure what would have happened had I fitted the other one.

6. I didn't fit a camera. The car has rear sensors that were audible only. The Pumpkin unit now adds a radar to the screen and the beeping sounds coming from the unit instead of the car. My only issue, which is still to be reviewed is that the graphic and beeping doesn't stop when you come out of reverse and start driving forward. It seems odd to me but my son says it was like that with the factory unit and he presses the park sensor buttons. He's happy but I'll wait a few days until he's used it properly to decide.

7. Unit is very responsive and the Google maps work really well.

8. Phone is good, contacts all downloaded fine.

Overall it really freshens up the car making the interior much more modern.

Very pleased overall.

Why Pumpkin AA0495B can be so popular?

Nowadays, buying an aftermarket car stereo has become a trend. The strengths of the aftermarket car stereo are more and more obvious. No matter price, appearance, System and extended functionality, the original car stereo is can not be compared to the aftermarket car stereo. So more and more people have noticed Pumpkin. We have made a data analysis in these days and found Pumpkin AA0495B is the best selling car stereo in all Pumpkin car stereos now. Therefore, we sum up a few points about this.

Cost-efficient

[Pumpkin AA0495B](#) is one of [the most cost-efficient Pumpkin car stereos](#). The current price is \$269.99.

Double din universal car stereo

It fits for many kinds of car brands, such as Acura, Alfa-Romeo, Audi, BMW, Buick, Byton, Cadillac, Chevrolet, Chrysler, Citroen, Cupra, Dodge, Fiat, Ford, Geely, Genesis, GMC, Honda, Hyundai, Infiniti, Jaguar, Jeep, Kia, Lancia, Lexus, Lotus, Maybach, Mazda, Mercedes, Mini, Mitsubishi, Nissan, Opel, Peugeot, Pontiac, Ram, Renault, Rivian, Skoda, Smart, Subaru, Suzuki, Toyota, Volkswagen, Volvo, etc. (Extra frame and adapter may be required.) Previously, Youtubers and Pumpkin showed installation on Ford, Nissan, and Alfa Romeo.

Powerful Octa-Core processor, built-in 4G RAM and 32G ROM

It runs smoothly and can be installed new games or play pre-installed ones. Also, you can install the apps you wanted.

The fastest boot speed

This in-vehicle infotainment system only takes 1 second to boot after being installed while others may take about 30 seconds.

Multi-touch Capacitive Touch Screen

The same touch screen as a smartphone, it supports dragging the apps icons, allocating the apps into a folder, zooming in the maps. It can be used smoothly, fastly and conveniently.

The other supported features

It also supports online/offline navigation, steering wheel control, phone mirroring and Bluetooth hands-free calling. With the extra device, cam-in/rear camera, OBDII scanner, DAB+, Android Auto/ Apple CarPlay are all accessible.

Overall, [Pumpkin AA0495B](#) precisely because of these features, so it can become the best selling of [Pumpkin car stereos](#).

How to Fix a Car Head Unit That Won't Turn On

If your [car head unit](#) does not power on successfully, you can try the following solutions to fix the problem:

1. Check that the 12 volt and memory wire are connected together. This is a common mistake that can cause issues to make the car head unit fail to power on.
2. Examine your [Android 4.4 car head unit](#) plug carefully, do you see in cuts in the wiring? Does the plug look damaged? If you do see any damaged in both aspects, then replace the plug.
3. Turn on your car ignition. Some car head units only turn on, when you turn on the ignition and start your car.
4. Check the fuse in the head units fuse holder. If its blown replace it and you hopefully fixed it.
5. Get a voltmeter and check the voltage on the red color wire, the wire that supplies 12 volts to the stereo. If

it shows a reading of 12 volts, then it indicates you have got a good power source and it's not the problem.

6. You could have a bad ground connection. Check if the ground wire is touching the car's metal. If there is any rust on the ground terminal, get a screwdriver and scratch it off.
