

Customer Review on Pumpkin AA0341B Android 9.0 Single DIN Flip out Car Stereo

I am really pleased with the radio, it can do so much and so well and so quickly, great product, I really have to praise it. Another thing about the radio, the installation on my car Seat Arosa H6 1998 was very easy, and so far everything works perfectly.

Here are some of the features of this car radio.

1. Flip-out screen: that looks pretty cool, you can also retract the monitor and continue playing the music.
2. USB/SD: it supports both the micro SD card and USB.
3. Menu: there are buttons on the panel, with the buttons, you can go to the main menu and control the volume.
4. Multi-color button: when turning on my car key, the buttons light up and they can be changed color.
5. Audio setting: you can use the slider to change the position of the box and other settings such as volume, EQ-3, bass, balance, VIP.
6. Radio: unfortunately we are now in the garage so it can not find anything here.
7. Video function: you can watch music videos, movies, and YouTube videos.
8. Bluetooth: after you paired your mobile phone to the radio, you can make a phone call and listen to music.
9. Navigation: I will show it works in the later video.

10. In the menu, you can see and set the WiFi/ Internet, auto settings, apps & notifications, storage, RAM, users and accounts, Google account and system, etc.

11. You can end all the apps once like mobile phones close everything.

12. We all know that watching movies while driving is forbidden, but it can fade in up and then the movie will run up there but the whole menu will have it. It's pretty awesome.

What's the difference of Android 8.0 and Android 9.0 car stereo?

Android was released to the public for more than 10 years. The latest version is Android 9.0 now. The focal points of this latest Android version are its intelligence, simplicity, and a heap of new, advanced and convenient features. Android 9.0 is also the latest version in the Android car stereo. But what's new compared to Android 8.0? Let's run down some of the most important changes in Android Pie car stereos.

Android 8.0 Oreo

PUMPKIN CAR STEREO Android 9.0

1.Name

Android 8.0 is officially named Oreo, Android 9.0 is officially named "Pie".

2.Interface optimization

Compared to Android 8.0, Android 9.0 is more stripped-back now. The Android Pie is more colorful, with more curves for the system. And the edges have been softened.

3.Respond speed

Android 9.0 improves response speed a bit so that Android 9.0 car stereos can run smoothly and bring a quick response.

4.Software compatibility

Compared to Android 8.0, Android 9.0 can be compatible with more software. So it will not cause many software incompatibilities, flashbacks, etc.

5.System functions

Android 9.0 has added new features, like Google unified push upgrade, deep integration with Project Treble mode, more

closed and native support for call recording, etc. But maybe some features can not be used on car stereos.

Why we choose an aftermarket car stereo?

As we all know, a car stereo can improve the driving experience. So a good car stereo is necessary. There are so many people who choose to install an aftermarket car stereo than use the original one. Because aftermarket car stereos have many good aspects which original ones can not achieve.

Price

Whether it is a high-grade version with the original car stereo or a slightly cheaper version, it is not comparable in price to the aftermarket car stereo. Aftermarket car stereo is cheaper than the original car stereo.

Appearance

In general, the panel and button design are more user-friendly and the material is slightly better. In addition, the car stereo manufacturer also meets the needs of the users and sets

some more commonly used buttons on the panel. The aftermarket car stereo is not only highly compatible with the original car but also more flexible in terms of use.

System and extended functionality

The original car stereo is still based on the WinCE system, and the system function is very single. For those who have used the smart system mobile phone, it does not necessarily meet all their needs. There are many aftermarket Android car stereos now. At the same time, the superiority of the system makes its extension function more prominent.

[Pumpkin Android car stereos](#) including Android 8.0 and Android 9.0, universal types and specific brands. Pumpkin universal car stereos fit for almost all car models, while Pumpkin car brand-tailored infotainment systems cover most of the Audi, BMW, Opel, Ford, VW, Skoda, Seat and Benz car models from 2000-2016.
