

Best Pumpkin Customer Service

The product is as good as advertised. The product is not the only story behind how amazing was this experience. I lost the manual after it arrived, I got in contact with the company and they sent an e-replacement manual right away. After I broke the faceplate that serves as a trim to the radio. I contacted them again to see if I could buy another faceplate and they sent one free of charge. Not only the product is amazing, but their customer service is superb. I have them as my go to vendor for other things.

Best Pumpkin Android Car Stereos in 2020

Pumpkin has released many kinds of Android car stereo, covers from single din to double din, universal to brand-matched, 6 inches to 10 inches.

All Pumpkin Android car stereos support online/offline GPS navigation, phone mirroring, steering wheel control, Bluetooth hands-free calling, RDS/RBDS radio. They have also supported backup rear-view camera, OBDII scanner, DAB+, Android Auto/Apple CarPlay, but these functions need extra device. (All these extra devices can be found in [Pumpkin online store](#))

we can see the greatest reason for Android car stereo is to connect with smartphones. Android car stereos are created to simplify our difficulties in any circumstances. The system includes voice orders, making it simpler to explore, settle on decisions, send writings, and that is only the tip. Also, you need not bother with a shiny new ride to encounter it, either.

List of Top 3 Best Pumpkin Android Car Stereo in 2020

Android 10

RAM 4GB ROM 64GB

[Pumpkin AA0505B Android 10 Car Stereo \(PX6, 4+64G\)](#)

It depends on the Android 10 framework, with 4GB RAM smooth running, and 64GB ROM. This permits you to introduce more APPs you like. In addition, it's anything but difficult to utilize similarly to having your tablet in the vehicle.

Android10

PUMPKIN CAR STEREO

RAM 4GB ROM 64GB

[Pumpkin AA0582B Android 10 Car Stereo \(Octa core, 4+64G\)](#)

This is a nice looking car stereo. It fits nicely in most cars and is also easy to install. The unit comes with many advanced features for a good listening experience. You get advanced android OS, superior wifi, navigation & GPS amazing many

others retires. We like the color screen which measures 7 inches. It's also a touch screen for easy operation. Moreover, the unit comes with several inputs to work with many devices.

[Pumpkin AA0509B Opel Android 10 Car Stereo](#)

It fits Opel/Vauxhall Corsa (2006-2011), Vectra (2005-2008), Antara (2006-2011), Meriva (2006-2008), Astra (2004-2009), Vivaro (2006-2010) and Zafira (2005-2010). You don't need to go for android stereos that seem not to work well. With this item, you get a very responsive product. It is very easy to operate and functions seamlessly. The range of advanced features makes operating it pretty easy.

[Solid unit for my 2002 Camry](#)

Android 10

RAM
4GB

ROM
64GB

This is the second [aftermarket android head unit](#) I put in this car. I had to cut wires and make connections for the first installation. This is in a 2002 Camry. I established the old connector was incompatible with this unit. I believe the only incompatibility was due to the power connections using larger pinouts for this unit.

Oh well, I had to undo the crimp connections from the first connector and remake them (again cutting wires from the new connector). I received no installation instructions. I checked the web site. No instructions there either. No matter. The wiring is well marked and I had the mapping of the car wires from the previous installation so I didn't have any issues, but be warned that you are on your own for the installation.

I had installed a reverse camera for the previous installation

and it was fine for what it was, so I reused it.

As with the previous aftermarket unit, I needed a bezel to make up the gap around the unit. It comes with one that wasn't quite wide enough. Fortunately, the previous install had a bezel that I could add to the one this unit came with. The combination can best be described as "adequate". I'm not particularly fussy. Again, I had lived with a different aftermarket unit so I knew what to expect.

I decided to make the change because the old unit was slow. Had a resistance touch screen. Booted slowly. Got confused if you drove somewhere and then put it in reverse. In those cases, it would not show the camera. Cycled between the home screen and the application list randomly as you drove along. Instantly "gets stupid" about the most recent Bluetooth connection when you turn the car off.

I had investigated a number of head units. My price threshold of pain was ~\$300. I really wanted to get a 10.2-inch display but was hesitant to forgo a physical volume on/off switch. I read a bunch of reviews of the 10.2-inch units and it seemed that there were a substantial number of units with problems. I looked up Android version 10 7 inch units and found this unit listed alongside an identical-looking Pumpkin unit for 60ish dollars less. I guessed that it was a "private" label version of the same thing. I doubt it is any more reliable, but it comes with the current version of Android, 10, and the latest Rockchip, PX6 so I decided it was worth a shot. So far, so good.

Pros:

- Fast boot (I left it at the default "automatic" instead of timed. It comes up from dead cold in about 15 seconds. From warm boot it is 1-2 seconds). I left it overnight and it comes up as "warm boot". Nice.
- Keeps the Bluetooth connection across restarts (hey,

it's new to me).

- Responsive screen.
- Snappy performance.
- Plenty of Memory (64 GB).

Cons

- I received it with no installation instructions. Not an issue in my case, but be warned.
- Didn't pick up my 5.0 GHz WiFi band so its on 2.4 GHz. I haven't bothered to see if it is a problem with me or it.

I would recommend this unit. It is a good value. Solid performer.
