

Decent quality and valued unit

Quality unit that works as advertised. Works well with other car launchers like Agama and Car Launcher Pro. I recommend PowerAmp media player although I'm still figuring out getting the PowerAmp EQ to work properly.

I was slightly skeptical about ordering one of these. But I decided to take a gamble and so far I'm pleased with the unit. Touch sensitivity and response is right on point. It's fairly easy to operate and more customizable than I figured it would be. It's basically just a big cell phone in your vehicle.

Upgrading from a 7" Android head unit to this 10.1" unit I had the advantage of experience with the OS and different car launchers. Take your time and research the capabilities of this PX5 Android head unit and you can do almost anything you want, car stereo-wise. Have fun making your car stereo experience your own.

Pretty wild Android head unit

It's a neat little unit, with a few quirks, it has insanely fast boot time, I wish the contrast was a. It better and slightly glares. I am going to try and put a piece of anti-glare film on it to see if that helps.

I would like a widget to turn on the backup camera without being in reverse. I have the following working:

- 1) GPS with voice assist using Google maps works well.
- 2) Google browser with voice assist works well.
- 3) Hot spot using iPhone working well. (I can download, I can mirror, I can browse with Chrome+Google.)
- 4) FM/AM works well.
- 5) OBDII working via BT using the Torque app.

6) TPMS working via USB.

7) Both reverse and park signals are working turning on the backup camera.

I'm still getting to know the product and might update later as I get more experience with this [Pumpkin Android 10 Car Stereo 7" Double Din Universal type\(PX6, 4+64G\)](#).

Bluetooth Flip Out Car Stereo

Android 10

CAR RADIO PLAYER

Fits great into my 2001 Porsche Boxster. It's fast, responsive, and sounds great. It has way more features than I expected. I paired the unit with some generic steering wheel controls without needing any additional adapters. The only issue with the unit is that you are limited in how you can tether your phone to share mobile data. This unit relies exclusively on WIFI / mobile hot spots, which is fine as long as you are charging your phone while driving, otherwise, mobile hot spots usually drain phone batteries quickly. I would love to see USB tether and/or Bluetooth tethering, but PUMPKIN does not currently support those features.

The touch screen is instantaneous, and I love that you can download apps to it. The wifi and GPS have worked flawlessly so far. I've used both my home wifi in the driveway and my phone as a mobile hotspot. I've made several Bluetooth calls

and asked the person on the other end how it sounded, and they couldn't tell I was on Bluetooth. I ordered the pumpkin backup cam which also works awesome.
