- 9.5 inch LCD HD capacitive touch screen
- Android 4.4 kitkat OS on your car DVD
- Free mic
- Support OBD2

- Support both 3G and WIFI
- Support Bluetooth
- Support 1080p video
- Support DVR

This [car DVD player Bluetooth](#) went into my Yaris without a single problem. I was able to install Waze and tether to my cell phone. Handsfree calling function works great, the stock GPS worked well, nice speed monitoring feature. This Android 4.4 car stereo warns nicely when speed limit is exceeded. I've only used it for a week, but it's been great so far.

—Review by Allen

Absolutely love this head unit. I've tried Poweramp, the standard Google music player and free play. Volume works with them all. Everything else works perfectly from the backup camera to the radio reception to tethering to my LG G3.

Great radio, really love it. I'm using it with Shuttle, too. It makes it sound great and you can flip through artists, etc. A shame you can't control the (old) iPod through the radio but I found it a lot more convenient in the end to use an SD card for music anyway, so no harm done.

[This car stereo](#) is awesome! I kept debating if i want to spend this much, i bought a cheaper 250 dollar one, happened to be that it was the wrong one in the box twice...so finally i ordered this one and WOW am i glade i did even the details are AWESOME. love the graphics and everything. May cost a lot more then i wanted to spend but it was well worth it.

Just trying to get my contacts to pair over via Bluetooth, but since it may be an issue with my phone I will not rate this any lower. Over all I am extremely happy and if your questionin

g buying this radio, stop and buy it!

[The FAQ OF PUMPKIN KD-C0340](#)

[Pumpkin Android 4.4 Kitkat Car Stereo 2/Double Din DVD GPS Navigation with 8 inch Head Unit Support 3G / WIFI / Can-Bus / OBD2 / Free Mic for VW](#)

Key Features:

- . Support Win CE System
- . CPU Frequency 800MHz
- . Support Can-bus
- . Support 3G
- . Support 1080P Video
- . Support DVR

1) regarding the 3G modem: Can you tell me, how to setup such a connection, I could not find any hints in the device menu.

Normally you need a 3G dongle.then just plug and play,please make sure you can buy a 3G Internet WCDMA SIM card from your local, because our item can only support that

2) In the app drawer, there is a shortcut for "Instructions", but when I click this icon, it just says "No file found". Can you tell me where to get such a file or maybe instructions at all?

you tell us the SKU of this product, so we can give the solution

3) Can you tell me the maximum capacity of a microSD card, which is inserted into the device?

Normally ,we suggest you use the SD card under 32GB.

4) Do you know how to improve the Wifi connectivity range? Currently it is really bad, except I put a device right into the car. I would like to synchronize things, by driving my car in front of the window, where the wifi router is located behind.

And please close the wifi power saving mode,it mean close the "wifi optimization".(setting --advanced wifi--wifi optimization)

The Second Customer Review

for Pumpkin 2 Din Universal Car DVD GPS Navigation Pure Android 4.4 kitkat Stereo Head Unit with 6.95 inch LCD HD Capacitive Touch Screen

In order to help you to understand and identify which one is popular [Android Car Stereo](#), we arrange some customers review for some hot selling product. Below is one review from JC

“Nice product. good quality and good price. I installed this in my 2013 Jeep Wrangler to replace factory RHB 430N. The Pumpkin unit performs very well and true Android 4.4. is awesome. I have installed many apps from Google Play and had no problems. I would give it 5 stars, but here are my reservations (in order of importance) 1. ****IMPORTANT**** Security setting (screen lock/pin code/etc.) have been removed or disabled. So anyone who has access to the unit (if it’s stolen) will have my contacts, email, music, etc. There should be an option for screen lock/unlock at power up to prevent this. 2. Documentation is a little weak and no specs for steering wheel control emulation makes getting that work a hassle – trial and error. 3. The radio tuner is a little weak. Local stations that I have no trouble receiving on other

radios come and and out. 4. The 'stock' launcher is a little limited so I am using Nova Launcher. This works great, but there is no way to turn radio app 'off' so once you launch it, it will keep playing in the background unless you kill it. 5. The unit takes a few moments to 'boot' so having a sleep mode would be ideal and could not be much of a drain on battery. 6. The stock music app is pretty much useless – no way to search for songs/artists, just scrolling. If you have more than a couple dozen songs stored on SD card, you have to download another player that will let you search. I am using Google Play Music and it's working great. With just a little more polish on the software side and I'd give it 5 stars. Note: I am using a 64GB micro SD card and it's working great. Windows users will have to download an SD formatter, but formatting as FAT32 on 64GB allows this unit to see all 64GB. Holds a LOT of my music. "
