

# Customer Review for Pumpkin KD-C0235 Universal 6.95" Quad-core Android 4.4 Double Din Car Stereo

By Tanksta

## Summary

This thing is awesome. I dry fired it in my garage with a battery/home theater receiver and couldn't be happier with how [this head unit](#) operated.

## Android 4.4 OS

If you know how to use Android , this thing is awesome. I will never use a regular car stereo again. The media options are endless with this head unit. Spotify worked great. Really anything you can do with any other Android can be done with this head unit. Very customizable.

## **Bluetooth for Hands Free**

I synced my phone with it which worked perfectly and was simple.

## **3G/Wifi/OBD2**

I was able to set up a hot spot and worked from my phone's internet. It paired up flawlessly with my OBD2 Bluetooth adapter and I was able to run Torque.

## **6.95 Inch Touch Screen**

I was a little nervous to buy this [Pumpkin car stereo](#) due to there being no reviews. I am glad I talked myself into going through with purchasing this. I was also concerned there weren't enough buttons but everything can be done easily with the drop down menu using the touch screen.

## **FM/AM RDS Radio**

I used a coat hanger as an antenna during this test operation and the radio functioned great and was easy to use after a few minutes of messing with it. Tune in radio worked awesome.

## **DVD**

I played a DVD and the quality was good but not 1080p, but I don't plan to watch movies with this much if at all.

# How to Keep Your BMW Android Car Stereo from Being Stolen

Even when you park your BMW in an area that is not known for being at high risk of theft, you should take all of the proper precautions to ensure that your BMW can't be broken into. Otherwise, it might happen like this:

It's important to reduce the probability of items getting stolen from your car as well by having the interior of your car look as unattractive as possible to criminals. This means you shouldn't flaunt an expensive [BMW Android car stereo](#) system in a car and you make sure your security system is fully activated.

## Things You'll Need

- Speaker covers
- Fake plate cover
- Security system

## Instructions

- Turn your car radio down when you begin to approach the area where you plan on parking. You don't want to call attention to your sound system to any criminals in the area that may hear that you may own an expensive [car DVD p](#)

[layer](#).

- Park in an area that is well lit with traffic and pedestrians often near by. If parking in a parking garage make sure there is a parking attendant on duty and cameras pointed near where you park your car.
- Take anything out of the interior of your car that could attract theft, including loose change, CD case or shopping bags. Place these items in the trunk of your car.
- Place speaker covers over any expensive speakers that can be visible from the outside. Consider placing a fake plate over your stereos head unit so that it looks cheaper than it really is.
- Make sure your car has an efficient security system. A system that is loud and calls attention to your car if it's touched is the best to use. Make sure all doors are completely locked and take note of your surrounding before leaving your car.
