Customer Review for Pumpkin KD-C1107 BMW E46 Series 7 Inch 1 Din Android 4.4 Head Unit

I had never heard of [this unit](#) before and found it on a random search through Amazon. I figured for the price and it was worth a shot, since the Dynavin is still a good bit more expensive... I am very impressed by it!

--By Corban Dallas

▪ Installation

Installation was silly easy, I got it done in a couple of hours and that was because I wanted to hide wires for the GPS antenna and Bluetooth microphone. If you're less picky than me, you could get it done in a half hour.

▪ Screen, buttons and knobs

The buttons and knobs are very well built, the finish is slightly more glossy than the stock business radio of the E46, though I suspect part of that is due to aging of the stock

materials. The screen is bright and clear and **the touchscreen is very responsive**, the colors and sharpness are great.

▪ **Audio quality**

I was worried that the audio quality would be worse than the stock CD player, but it's definitely not when using equal mediums (CDs, iPod, radio, etc). But when streaming Bluetooth, it's not the best. Most people probably wouldn't notice the difference (my friends didn't), but if you're like me and like clear audio, you'll want to stick to CDs, SD cards or an iPod.

▪ **GPS navigation system**

I love the navigation which **displays the speed limit of the road you're on** as well as warning you if you're speeding. **It can also display any nearby gas stations, hotels and many other things** and lets you choose which one you can see or not see.

▪ **App installation**

The unit **comes with a .apk installer app** so that you can install any app from the Google Play Store from an SD card, or anywhere else you could find a .apk app. It also **has the Google Play Store app installed** on it, so if you use your phone as a mobile hotspot for the on-board WiFi or use a 3G data card in your unit, **you can download apps directly from the store**. The included apps are pretty good. My only gripe with the pre-installed music player is that there is no shuffle button, that seems like a huge oversight, otherwise it works well and the equalizer presets are pretty good, as in the custom mapping option that it gives you.

▪ **Conclusion**

All in all, **I'm very happy with this unit and would highly recommend it to anyone**. It's made the interior of my E46 feel much more updated and new. In fact, my girlfriend just bought a new Ford with the "My Ford Touch" option and she agrees that

the nav screen in my E46 is better.
