# <u>How to Fix These Frequent</u> <u>Issues of Android Car Stereo?</u>

**Q1:** I set up the date to be the GPS date. The GPS show the rig ht hour, but on <u>car stereo</u>'s main menu the time is 1 hour diff erent. The time zone is correct. Could you help me to have the right time ?

Please don't use local time, forward or backward to adjust the time zone. You can adjust the time in Setting.

**Q2:** When playing music from the SD card, the player is not moving to the next song or is getting stock after few songs. Is issues with app ? Is any update for that?

Please use the small storage SD card, preferably less than 32G B. Did you have some songs for lossless formats or other forma ts ? Please use the flash disk or MP3 player.

Q3: Why the GPS of <u>Android car DVD player</u> can't get signal
?

About the GPS signal, please check the following issues:

- GPS antenna didn't connect well with the GPS slot;
- GPS is put to the wrong place, please put it to a good r eception place;
- Bad weather or the building around would affect the rece ption of the GPS, please try it another day or another p lace for good reception.

https://www.dropbox.com/s/9pdbohtmzlxlv9g/affect%20satellites%
20reception.jpg?m=

• The wire which connect the GPS slot and the mainboard is loose, please open the car stereo and check inside.

Q4: Why the media unit of <u>car DVD player</u> is dead ?

Have you tried to reset the head unit? If no, please reset the unit by using a needle to press the "RST" for more than 2 sec onds. Before doing this, please make sure that both your car a nd the head unit are turned on.

If you've already done above and found nothing help, please re move the car DVD player and wait for half a day, then power on and check again.

However, if it's still nothing improve, please reinstall the system according to the instruction below:

http://www.news.autopumpkin.com/how-to-upgrade-your-android-he ad-unit-from-4-2-to-4-4-kitkat/

Listen to music online, through the USB port, o r via an Apple device.

# <u>How to Install an Android Car</u> <u>Stereo</u>

First, turn off the electricity to the machine by removing the live battery wire from its station. After disconnecting the b attery, you'll need to take off the trim boards enveloping you r <u>car stereo</u>. Each car just a tiny bit unique here.

Next, you need to dispatch the previous head unit directly out until the wires connected to the back are accessible. Unplug the cord, discharge the cabling harness and proceed to remove the antenna cable by unscrewing it. The cabling harness is the structural fastener that integrates all of the cabling for th e sound system into an individual connection. The new <u>head uni</u> <u>t</u> you have purchased should have included an adapter that matc hed the factory installed cabling. The end of the cabling on t he end, should have four to eight colored wires coming from th e back. There should be two such wires that plug to each speak er; one positive one negative. Most negatives are shown with a black stripe while positives are generally either solids or h ave a white stripe.

If your new <u>car DVD player</u> does not come with an adapter that works with the harness in the dash, you need to purchase a cab ling harness kit. The new harness will have to be plugged into the new stereo. Match the colored wire to its match and put t hem together. After having the wires connected to their proper match, the stereo should be ready to install. Hold the system to the dash to plug the proper connections into the back. You can pause and test what you have done to make sure you have c orrectly pared the wires.

Once you find that everything is in order; proceed to carefull y push the unit all the way into the dash and replace the scre ws. After the stereo is mounted correctly, put the trim boards back up and reattach everything holding them in place.

Finally, you got a new <u>Android stereo</u> for your car.
