

Amazing head unit for the price wow awesome !

Android 10 PUMPKIN CAR DVD STEREO

I replaced my blown out head unit on my 2006 Volkswagen Jetta which was an aftermarket [Pumpkin](#) product with this [7 inch double din head unit](#). First of all, the cost is amazing. I didn't know much about this brand of electronics, but I did some research and read the reviews. I decided to purchase it and I was glad that I did this unit is fantastic. The graphics and the simplicity of usage is awesome and the install was fairly easy. I had his head unit installed by a professional installer, the geek squad at Best Buy along with a sub woofer an alpine power amplifier, and this unit sounds so nice. The DVD that you play back on this is awesome. The graphics though the resolution amazing. I would definitely buy it again and I would highly recommend it to all my friends and family. I have gotten a lot of complements not only on the head unit but the sound quality it is a powerful head unit with lots of power to spare. And especially with the amplifier and sub woofer well, what more can I say amazing great price.

Android 10 Car Radio - Does what you need without the Brand Name

I bought this [Android 10 car stereo](#) two weeks ago for my KIA Sportage 2005, then I thought it was Worth every penny.

Spotify is great, Youtube is awesome and Google maps and Waze are all great. Almost like having a tablet in your car. P.S. yes, you need your phone's hotspot or some sort of internet connection to stream. you CAN download stuff to the unit like

Spotify, youtube videos, etc. so you'll always have your content or put them on an SD card.

Excellent once I figured out I needed to set the country before the timezones. I added an SSD drive to hold a ton of media files and also a rearview camera. It switches automatically to the camera and back without missing a beat.

Also, LOVE that plex works on this.
