

Customer Review on Pumpkin 10.1 Inch Android 5.1 Car Navigation DVD-RQ0265E

Got this [Pumpkin Android 5.1](#) Car DVD for my 2012 Mitsubishi L200 Barbarian which has a [double din](#) navigation unit fitted as standard. I was a bit hesitant going from a well known manufacturer to one I don't know but I'm glad I did. From the box that it was delivered in (shiny cardboard shouldn't have impressed me as much as it did) and the well protected packaging inside I was reassured that if they pack it this well they must have faith in

their products.

Installation will vary from car to car and I already have a [reversing camera](#) attached to my pick up so cut and spliced wires together (is comical looking at a screen so big reversing as I'm used to a 5.5" screen).

The look of this [Pumpkin Andorid](#) unit is typically android which I know and love, it's fast, has a good EQ system and plays MP4 video files (even on the move).

My only criticism is on a bright day (not many of them in Scotland) the screen can be difficult to see by glancing so needs to be focused on and the volume controls are on the left of the screen, not the right, only an issue if you are driving a RHD but I'm guessing these are sent all over the world so the LHD folk probably love that feature.

All in all I'm glad I bought it, great bit of kit ☐

– by Ross Campbell

Already have Spotify, Pandora, Netflix.

Its fast and really touch responsive.

The first time it takes 30 s to boot but after that its amazing fast.

Audio quality its great and Bluetooth synch is good.

You can customize everything.

It fits perfectly on my Nissan Juke 2014

I was worried because I never used this brand before, but until now it works amazing.

Radio Reception is +/-

Wi-Fi works perfect so I always use hotspot with my cellphone.

[Customer Review on Pumpkin Android 5.1 Car DVD Player](#)

BMW 3 Series E46 M3--RQ1130E

I have just installed the [Pumpkin](#) car dvd for [BMW](#) E46 today and can say I am very happy with the results however I have a couple of things that need mentioning:

No 1. compatibility of the built in harman kardon system as i thought I would need to rewire all of the speakers however everything has worked without rearranging of the wires and it was a straight forward plug in (business cd).

No 2. the harness plug on the [Pumpkin](#) car dvd [bmw e46](#) was very fiddly and it broke the clip in the BMW car so I had to remove that for the harness to fit in.

No 3. problem sliding the unit back into the dash due to the yellow and black wires running into the fuse block of the [Pumpkin](#) harness. I had to cut the wires and extend them which eventually gave more space and the unit fitted in perfectly.

The problem with [reverse camera](#) is verry simple you must cut the wire from reverse camera. The plug from dvd didnt work so easy but if you try a little bit hard will be plug. I own a e46 from 2004. And no other problems. No lag no nothing everithing work proper!

The buttons and knobs are very well built, the finish is slightly more glossy than the stock business radio of the E46, though I suspect part of that is due to aging of the stock materials. The screen is bright and clear and the touch screen is very responsive, the colors and sharpness are great.

The bmw dvd gps car radio comes with a .apk installer app so that you can install any app from the Google Play store from an SD card, or anywhere else you could find a .apk app. It also has the Google Play Store app installed on it so if you use your phone as a mobile hotspot for the on-board wifi or use a 3G data card in your unit you can download apps directly from the store.

Over all I am very happy with this Pumpkin unit. Only one thing I forgot to plug in was GPS Wire which I will leave for another day.

[Customer Review on Pumpkin VW Android 5.1 Car DVD GPS for VW Skoda Seat Passat-RQ0368E](#)

Installation was straight forward, needed to buy a radio antenna adapter for my 11 plate scirocco as the one supplied didn't fit.. All the features I have tried work as they're supposed to.. All in all good alternative to the more expensive branded ones on the market.

– by Gareth

Excellent. I have been reading all other reviews before I purchased this [Pumpkin vw android](#) car dvd gps and I will say, they are very honest.

It took me about 2 hours to install the vw car dvd player that includes removing the old one.

Another hour to install [reversing camera](#) which is a great addition to the vw car stereo.

The whole package works superbly. The canbus talks to the car without any errors. I have a skoda vrs 2009.

The sound quality is on par with the previous head unit.

The [3G dongle](#) works well. Its takes a short time to connect so be patient. I am using 02 pay as you go sim. There are others

you can use. I will add so pictures soon.
Overall I would definatley recommend this unit to anyone wishing to change there in car entertainment.

– by Dave

Very good radio for car. Cannot say there's anything it can't do apart from make a cup of tea. Very easy to use, very easy to install. Bluetooth,WiFi and everything working perfect. Syncs to phone very well not used the [reverse camera](#) yet though as it stands out from a mile away and will probably get stolen in the places I park my car. Was expecting the camera to be small but is not. Might be able to drill a viewing hole in rear bumper and install behind bumper sum time. Bought extra [headrest monitor](#) screens as well for the rear of the car which are nice and easy to connect to the radio itself. Very self explanitary all connections can only go in the right slots so it's near impossible to install wrong unless you start cutting wires which is definitely not needed with this system.first radio I've seen that has Google play store on it. Only problem is I'm more interested in playing with the system than watching the road,lol
