

Customer Review on Pumpkin Wince 6.0 Car DVD Player GPS 1 Din

Bought the WinCE 6.0 Car DVD GPS Player with [reversing camera](#), really good product, stereo was easy to connect and set up, camera works great and cable was long enough for my T4 van. Radio has good reception and everything does what it says

on the tin. very happy with the stereo overall, at this price you cant go wrong.

-by J Brittain

So I bought this [Pumpkin](#) head unit for my 1980s classic sports car. Looks great has a clean look to it and reminiscent of "Becker Mexico" (in my imagination) so looks better than the original 1980s stereo.

[Reversing camera](#) was easy to fit but a little confusing to connect But nothing got damaged during my efforts (but I am relatively competent)

Sat nav is pretty good and so is reversing camera – the two main reasons for wanting to install this for me

You can set up your own wall papers – you need to store them on the Nav card not the card in the spare SD slot

Couldn't get the boot up screen to work at all – never seems to need it... (don't know what that's all about, there is no boot up time)

Quality and finish pretty good.

You can set the screen angle to 1 of 3 positions – you need to cycle through them with a button. It then remembers. Trouble is when first powered up it defaults to vertical not tilt forward so if you have an installation that leans the screen back so that it hits some part of the dashboard you have to slide the unit in after you've set up the screen angle forward and every time it then looses power you have to repeat. not normally a problem but something to be aware of – doesn't seem to mash things when it happens the screen just closes after it hits the dash

[Customer Review on Pumpkin VW DVD Car Radio Navigation System](#)

This [Pumpkin](#) Radio is exactly as it says on the description. It fits perfectly in a 2007 MK [VW](#) Golf GTI. The fitting instructions don't really explain anything but, in all honesty, you don't actually need them. Its literally plug in and play. The only problem I found with it is that on a standard VW radio, it has the 2 ports for the Arial but with this, there is only space for 1 of them. The radio works just fine with just that 1. Also when the car is reversing it loads up the screen for a [reversing camera](#) which I didn't get(this can be solved by disconnecting the relevant wire). It is mildly annoying but you can still hear the radio/CD/Bluetooth music. The GPS works fine, but even if you mute it the music goes quiet when you come to a junction/roundabout. I haven't figured out how to change the back light colour yet either as it shows. The settings are VERY basic in the menu. Overall I would definitely recommend this vw car radio navigation to anyone looking for something like this. Amazing value for money!!

-by Daniel

Fitted this to our [Volkswagen](#) EOS (2007) to replace the radio and add new options. We had a next delivery – arrived on time, nice packaging, super easy to set up and we were very surprise by the quality ☐☐ very good price as well. Gps is quick to find satellites and location. The radio is good at picking up stations – Bluetooth picked up my phone straight away and my contacts were downloaded in seconds. We can use as well Spotify Connect with my iPhone 6 Plus

[Customer Review on Pumpkin Car DVD GPS for Toyota Camry Aurion](#)

Just installed this [Pumpkin](#) head unit on my [Toyota](#) Camry 2007 and it works perfectly. The product is super easy to put it (it fits it works) and i don't have to use any extra cables that come in the box. Although I knew nothing about cars before, it took me only 1h to do it (while watching youtube on my phone on how to remove the previous DVD player) and today I saved more than \$150 (professional labor). I took one star off because it made me confused with unclear instructions. Finally, I ended up not using the [backup camera](#) because I don't know how to do it. They should post a video on youtube channel so that their customers can save time and money. Don't know how long it lasts, will update later!

This factory-style navigation deck is probably the best system you could get for under \$500. Because the system is based on an embedded OS WinCE 6.0, it is not as customizable as an [Android](#)-based system or an brand-name aftermarket deck; however, it is extremely stable and user-friendly. Once you program your GPS/navigation, audio setup, video setup, bluetooth functions, [reverse camera](#) and steering wheel controls, it will consistently operate that way without any complications or errors. In addition, because it looks just like a factory Toyota deck and won't fit any other car, you wouldn't have to worry about any thieves touching the radio since it's pretty much worthless to them. In order to complete the package, I would suggest replacing the included external surface camera with a CHUANGANZHUO LYSB00RD05M00 reverse camera (which has a sealed all-metal case), also available on Amazon. You'll need to remove the trim piece on the trunk lid to drill and install the camera under it; and also shim the camera to get the right viewing angle; but it'll all be worth it in the end because it will look as slick as any OEM back-up camera.
