After Installation:

I have just received this [android autoradio dvd gps](#) and installed [Pumpkin](#) for Ford. I have installed this [android double din radio](#) on 2004 Ford F-150 Lariat and also 2005 F-150 Lariat. It is exact fit for both pickups, you do not need a frame or any other part. Installation and connecting the wires are extreme easy because this [car dvd](#) comes with sockets and adapters for Ford manufacturer connection fitments. Hook up

the cables with no soldering, no cutting, no taping and no extra wire running. I kept GPS antenna above the device not even needed to take it outside on the dash or anything. Very good reception. This [Pumpkin car stereo](#) is extreme fast and very responsive. Touch screen and everything is just perfect, i mean i cannot explain how happy and satisfied i am with this product.

I am also going to install esky [back up camera](#) with wireless receiver and transmitter. For that reason i didn't close up the dash frame completely yet as you seen in my photos.

I installed this [doubt din navigation radio](#) like in minutes. All plug n play. My car is a 2005 Ford Freestyle.

Issues I had was Mirrorlink, but I got an link for an update and works fine.

The radio covers lots of Ford cars, but the one issue is the Can-Bus adapter. Some will get reverse sense for backup while other need to wire to reverse wire(Me). Also RES on the Freestyle is not retained. I see this as very common (Read Entertainment System (DVD)).

This I will look into when it gets warmer.

This [android double din head unit](#) came very fast and is 100 percent plug and play in my ford.works amazing awesome screen resolution.a definite 5 star on performance and installation.

[Customer Review on Pumpkin Android Double Din Car Radio for Chevy Chevrolet GMC](#)

Installed in 2007 Chevy Avalanche:

Had this [android double din car radio](#) installed in my 2011 silverado. Looks stock and is way more advanced than radios on new cars. I hit up a WiFi Hotspot to download apps. The [OBDII](#) thing is cool. Crisp picture and sound. Lots of options. Wallpapers are download able from zedge. Bluetooth is simple.

Navy system is great.

If you install the 2 inch round speaker thing, cover it with a roll of E tape, it's super loud for the key chime and blinker click.

Update. I purchased another silverado, LTZ edition, so I ordered one more of these radios. This time I installed it myself. Some flat screwdrivers and a 6mm socket. No cutting and splicing wires. Plug and play. Complete install except for [back up cam](#) in 30 minutes

Nick Fury had this radio in caption America Winter solder. In the Chevy that had everything.

This [android dvd player](#) was bought to improve my silverado on the resell value. I'm very impressed as it looks like it's a buyers option. The radio has many features, more than I need but for the price I'm not dissatisfied. The radio is basically a plug and play but I had to break alot of plastic in the dash housing to make it fit as well as stuff all the wiring wherever I could. I don't use the camera so I would like to know how to keep the radio on when in reverse, maybe cutting a couple of wires. Overall I'm very happy giving this is the 3rd radio I've installed in my truck and hope this is the last.

–by Creig Denton

This [android head unit](#) is awesome has so many features to choose from for intertarnment in the description it says for 2009 – 2011 gmc acadia with bose but worked awesome on my 2007 gmc acadia slt if your glove box has the code v2p on vehicle sticker this unit will work. Its a simple plug and play and running of acouple cords and antenna sterling wheel controls work great.
