

Customer review of Pumpkin Android 5.1 Car GPS Stereo for VW

A few months after [Pumpkin Android 5.1 Autoradios](#)' Release, customers like these adorable head unit very much and they also have something to say, let's check out together:
Installed in **VW Touren fra 14:**

I was very hesitant to buy this [android head unit](#) based on one review, but then I found a Youtube video with a live demo.

In short: it's a cool [android 5.1 car stereo double din for VW](#). It's kind of like having a tablet in your car, with a few add-ons like radio and a DVD player. I also have a backup camera hooked-up (I could use the pre-installed one instead of having to use theirs). Apps install like on any other Android system. So far I've installed Pandora radio and Waze. There is a built-in GPS, but if you have a hotspot function on your smartphone, you can use Google Maps or Waze as well.

The installation was pretty straightforward in my **2011 Tiguan**

SE. The supplied wire harness fits perfectly, and I was able to reuse the existing radio antenna, GPS antenna, and backup camera.

The lines on the backup camera indicating where you're going will only work once the system has fully booted. The camera itself works immediately.

–by S

For those that said the cd/DVD player of this [android 5.1 autoradio gps for vw](#) will not accept a cd/DVD all the way, you need to remove two screws on top of the unit prior to install.

PROS:

- Perfect fit in **2010 Jetta**, pure Android, Quad Core processor
- VW wiring harness included, just plug and play
- steering wheel controls work when the included CANBUS adapter is installed. Plugs into the harness. But you need to program the controls by selecting steering from the main menu then selecting MODE. You then press which function you want to program such as “volume up” on the touch screen then press the “volume up” button on the steering wheel for the unit to learn which buttons do what. When complete, press the OK/save icon. I got volume, next/back, and call answer/end buttons to work.
- GPS appears to work. Finds my location quickly but I haven't tried the interface for navigation yet. I always use my phone for nav so might not use this capability. I did notice that you can store gas mileage information in the GPS section which is handy.

[Pumpkin Android 5.1 Mercedes Benz Navigation DVD Player Released!](#)

After [Autopumpkin](#) releasing more and more [android 5.1 car gps stereos](#) including [universal double din android 5.1 car gps radio](#) and specific android 5.1 car head units designed for special car models, many people come to ask if there's [Android 5.1 Mercedes Benz Navigation DVD Player](#), so today we'll introduce you guys the [android 5.1 car head unit for Benz](#).

[Android 5.1 Car Stereo for Mercedes Benz](#)

Details for [Android 5.1.1 lollipop car DVD Player](#) for Mercedes Benz:

Description:

As always, the unit is equipped with Android 5.1.1 Lollipop Rockchip PX3 Cortex A9 Quad Core 1.6GHz operating system, incredible 1024*600 Resolution, large screen, built-in WIFI, Bluetooth, GPS Navigation. It supports SD Card, USB, OBD2, Reverse Camera, Airplay Mirror Link, 3G, WIFI and so on. Autopumpkin android 5.1 car gps stereo for Mercedes Benz is absolutely ideal for driving. Drivers feel like having another android phone which is installed in the car. The Specific CANBUS adapter for Benz makes the steering wheel control work as well.

It can fit:

The following car model and year are for reference, please make sure your original car radio has the same shape as our unit.

Benz A class W169 2004-2012

Benz W639 2006-2012

Benz B class W245 2005-2012

Mercedes-Benz Viano 2006-2012

Mercedes-Benz Vito 2006-2012

Benz W906 2006-2012

Note: If your car has Fiber Optic amplifier or other amplifier built-in, then your car has digital sound processor, this stereo DO NOT support that, you may need manually connect speakers cable directly to the car speakers to make it work, please ask technician to modify this if you do not know how to do!

GPS

Map Storage Mode: Micro SD Card

Voice Guidance: Yes (Include most Languages)

3D Map: Yes

POI Display: Yes

GPS Communication Port: Auto Search and connect

AV Output

Many car radios in the market can only spread the DVD video to [headrest](#).

This unit can display almost everything to your headrests, even the online Youtube video and the video from USB/SD card .

Steering Wheel Control

Change the track, volume, etc. conveniently without taking your hands off the steering wheel, which makes your driving much safer.

DAB+ Digital Radio ([Extra DAB+ box](#) required)

Digital Audio Broadcasting allows you multi-regional music with your local well-known and also new channels. CD sound quality and noise-free in excellent transmission make DAB Radio a special experience in the vehicle. Permanent increase in channels and expansion of the station area soon make DAB accessible to most of Europe.

(If interested , please buy the DAB+ box from us)

OBD2 (Extra OBD device required)

Compatible: Most of [Bluetooth type ELM327 OBD2 scanner](#)

(Search Y0004 on our website)

Compatible Application: Torque

Display Data: Real-time data and trouble codes from vehicles computer.

(Attention: Few cars may not support the ECU reading accessing, those cars will not work this function.)

Cam-In (Extra [backup camera](#) device required)

Support reverse camera input , automatically trigger to reverse camera when reversing the car. (Only support RCA type reverse camera input).

Optional warehouse and logistics:

Orders can be shipped from German warehouse,UK warehouse and Hongkong warehouse.This makes you free of high customs tax.Orders in our US website will be shipping from Hongkong. Hongkong warehouse could provide you more auto radios and accessories.

If you're from UK,it's better to purchase from our [UK website](#),then the order will be shipped from UK without custom fee.If you're from other European country,it's better to purchase from our [DE website](#),then the orders will be shipped from Germany without custom fee.

Guide before purchase:

1.Please measure the size of your car center dashboard console and make sure our stereo size is suitable for your car.

3.Please send us photo of your car's dashboard and tell us your car model and year if you could not confirm whether it will fit and work on your car perfectly.

Professional after-sale service:

We will help you solve every problem patiently and let you experience comfortable service.Help is always on the way. If you ever have a question or a problem with any of Autopumpkin products, please feel free to contact autopumpkin@gmail.com for help.

[Customer Review of Pumpkin Android 5.1 Car Stereo Double Din--RQ0264](#)

This is my second [Android head unit](#) and I am never going back to a regular one ever. This [android 5.1 double din stereo](#) came shipped in a standard box wrapped in black plastic. Installation was pretty straight forward if you've installed car stereos before. I'm not going into detail about how awesome Android is so I'll skip that part.

The screen looks great and so is the touch sensitivity. I was able to load all my favorite apps with no problems (Kodi, Netflix, Hulu, Waze, iHeart radio etc..). I loaded a 32gb usb stick with some tunes and movies for a 3 day camping trip 300 miles round trip this summer and everything worked perfect for me. The built in GPS software did OK, but I mainly used Google maps or Here maps from Nokia which allowed me to download the maps for free.

I wanted to take advantage of every function this unit has to offer so I installed the backup cam, a dash cam and a [bluetooth OBD2 diagnostic tool](#).

The [backup cam](#) is quick and responsive and turns on when I shift to reverse quickly even if the unit is still booting up.

The dash cam I am using is a 1080p Logitech USB camera that I had laying around from an old laptop, this [Pumpkin Car head unit](#) recognized it the moment I plugged it in and is so far working perfectly.

The OBD2 tool along with Torque has save me many trips to the mechanic and a nice amount of money too so that was a very

good investment.

As with most Android devices there are custom ROMs available for this android car gps radio on the XDA forums which the makers fix and upgrade many issues. It is almost expected of anyone using this Android unit to go read through the forums and install the custom firmwares for a better experience.

I was offered this [Pumpkin Quad Core 7 inch Head unit](#) at a discount in exchange for my honest review and so far it's working out fantastic for me.

This is my second [Android head unit](#) and I would recommend this to everyone because it offers so much more than standard units. As a matter of fact, to date two of my buddies have gone out and purchased the same unit after having seen mines and what I can do with it.

—by **Daika**

A very good [android 5.1 headunit](#) if your good with electronics. It has so many features, i cant name them all. To be able to have the best experience you need a wifi usb stick or wifi hotspot. Only reason to connect your phone is Bluetooth for hands free calling.
